Feminism and the Western in Film and Television Mark E. Wildermuth,2018-04-17 This book works to complicate and push against common arguments that the Western from its inception is an anti feminist genre By focusing on representations of women professionals in Westerns it shows that women in cinematic and televisual Westerns sometimes do acquire agency and empowerment in the private and public realms despite our culture s tendency to gender the former as feminine and the latter as solely masculine The study reviews the relationship of these progressive Westerns to both explicit and latent feminist ideologies relevant to their times as the films evolved from the 1930s to the twenty first century

Critical Method and Contemporary Film Christopher K. Brooks,2019-09-24 This volume offers film enthusiasts and teachers an investigation into what film critics do and examines what ideologies inform their evaluations By employing recent television programs and films and comparing them to older ones the study is able to trace changes in the methodologies of film and media critics The work argues for the emergence of neofuturism as a chosen method of interpretation contrasting with the dominance of postmodernism as the evaluative method through the early years of the new millennium It also asks the questions who evaluates film and why In doing so the study questions the criteria for film evaluation the validity of some reviews and asks the question whether the evaluative system needs to change altogether

Television Westerns Alvin H. Marill,2011-06-01 Westerns have featured prominently in films almost since motion pictures were first produced at the end of the nineteenth century and when televisions invaded American homes in the late 1940s and early 50s Western programs filled the small screen landscape Throughout the 1950s and well into the 1960s these shows dominated television with such long running successes as

Bonanza Wagon Train and Maverick And though the genre has fallen on hard times over the years it has never died as Hollywood continues to produce films mini series and shows that keep the west alive In Television Westerns Six Decades of Sagebrush Sheriffs Scalawags and Sidewinders Alvin H Marill looks at the genre as it was represented from the beginning of television from the twenty year run of Gunsmoke to the brutal revisionist take of Deadwood This volume encompasses all manifestations of the Western including such series as Rawhide The Virginian and The Wild Wild West as well as movies of the week mini series failed pilots animated programs documentaries and even Western themed episodes of non Western series that provided their own spin on the genre

The Synchronized Society Randall Patnode,2023-03-17 The Synchronized Society traces the history of the synchronous broadcast experience of the twentieth century and the transition to the asynchronous media that dominate today Broadcasting grew out of the latent desire by nineteenth century industrialists political thinkers and social reformers to tame an unruly society by controlling how people used their time The idea manifested itself in the form of the broadcast schedule a managed flow of information and entertainment that required audiences to be in a particular place usually the home at a particular time and helped to create water cooler moments as audiences reflected on their shared media texts Audiences began disconnecting from the broadcast schedule at the end of the twentieth century but promoters of social media and television services still kept audiences under control replacing the schedule with surveillance of media use Author Randall Patnode offers compelling new insights into the intermingled roles of broadcasting and industrial post industrial work and how Americans spend their time

Channeling Violence James T. Hamilton, 2021-04-13 If it bleeds it leads The phrase captures television news directors famed preference for opening newscasts with the most violent stories they can find And what is true for news is often true for entertainment programming where violence is used as a product to attract both viewers and sponsors In this book James Hamilton presents the first major theoretical and empirical examination of the market for television violence Hamilton approaches television violence in the same way that other economists approach the problem of pollution that is as an example of market failure He argues that television violence like pollution generates negative externalities defined as costs borne by others than those involved in the production activity Broadcasters seeking to attract viewers may not fully bear the costs to society of their violent programming if those costs include such factors as increased levels of aggression and crime in society Hamilton goes on to say that the comparison to pollution remains relevant when considering how to deal with the problem Approaches devised to control violent programming such as restricting it to certain times and rating programs according to the violence they contain have parallels in zoning and education policies designed to protect the environment Hamilton examines in detail the microstructure of incentives that operate at every level of television broadcasting from programming and advertising to viewer behavior so that remedies can be devised to reduce violent
