Vocational Psychological and Organisational Perspectives on Career ,2009-01-01 It has long been lamented that although several disciplines contribute to career scholarship they work in isolation from one another thus denying career theory research and practice the benefits that multidisciplinary collaboration would bring This constitutes a lost opportunity at a time when new understandings and approaches are needed in order to respond effectively to global changes in society and work This book takes a major step towards remedying this situation by bringing together two key perspectives on career the vocational psychological and the organisational interpreted broadly to include organisation behaviour and human resource management Written by international experts the book opens by identifying some of the tributaries that flow into the great delta of careers scholarship and noting the need to link what are at present separate islands of scholarship It is structured to allow comparison between the ways in which the two perspectives address career development and career management theory research and interventions It concludes by pointing to the possibilities for dialogue and even collaboration between these perspectives and suggesting ways in which these could be brought about The book will be essential reading for career scholars because with its potential to stimulate new thinking and developments in theory and research and also importantly in practice with beneficial spin offs for policy makers this dialogue could open a new phase in career scholarship With its overviews of the history theory research and practice of both perspectives the book will also be a valuable resource for students of both perspectives *Sexual Harassment of Women* National Academies of Sciences, Engineering, and Medicine,Policy and Global Affairs,Committee on Women in Science, Engineering, and Medicine,Committee on the Impacts of Sexual Harassment in Academia,2018-09-01 Over the last few decades research activity and funding has been devoted to improving the recruitment retention and advancement of women in the fields of science engineering and medicine In recent years the diversity of those participating in these fields particularly the participation of women has improved and there are significantly more women entering careers and studying science engineering and medicine than ever before However as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers Over thirty years the incidence of sexual harassment in different industries has held steady yet now more

women are in the workforce and in academia and in the fields of science engineering and medicine as students and faculty and so more women are experiencing sexual harassment as they work and learn Over the last several years revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers Sexual Harassment of Women explores the influence of sexual harassment in academia on the career advancement of women in the scientific technical and medical workforce This report reviews the research on the extent to which women in the fields of science engineering and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment retention and advancement of women pursuing scientific engineering technical and medical careers It also identifies and analyzes the policies strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings
