

TNM classification of malignant tumours 7th edition: what's new for head and neck?

Accepted for publication 21 April 2010

The TNM System for the classification of malignant tumours was developed by Pierre Denoix, France, between 1943 and 1952. After international consultation, the system was adopted for clinical use by the UICC (International Union Against Cancer) Committee on Tumour Nomenclature and Statistics in 1953. In 1958, larynx and breast were the first anatomic sites to have site-specific clinical stages. Since then, seven editions of the classification have been published.

The TNM system has delivered considerable benefits by standardising the description and reporting of cancers worldwide. It is primarily an anatomic/morphologic system that helps prognosticate by documenting the disease burden at the primary site, the neck and distant metastases. The system however has been challenged for not encompassing other factors that have been found to have a significant bearing on tumour behaviour, such as concurrent co-morbidity and unique tumour characteristics. In the latter situation for example, over 15 different malignant salivary gland pathologies share a single generic system designed to stage all salivary gland malignancies.

It has been 7 years since the last edition of TNM. However, most head and neck clinicians will be pleased to hear that there are only minor changes in the classification system for head and neck cancers, compared to the more extensive overhaul that took place with the 6th edition. The main thrust behind the current edition (TNM 7)¹ has been the recent advances in personalisation of prognostication in some cancer sites.

The trend towards improving the prognostic efficacy of TNM by including of markers of poor prognosis, other than stage, is likely to continue. The current edition incorporates grade of histological differentiation for oesophageal cancer, and PSA (prostate specific antigen) and the Gleason score for prostate cancer. As knowledge expands on the role of human papillomavirus status in head and neck cancer, it would be hoped that this could be incorporated into the prognostic system of head neck cancers, especially in oropharyngeal cancer.² Comor-

bidity has been shown to have a significant impact on prognosis and is another candidate for inclusion.³

New classifications

This new edition has major changes in six cancer sites (oesophagus, stomach, lung, skin, vulva and prostate). There are nine new classifications including melanoma of the upper aerodigestive tract, gastrointestinal stromal tumours, appendix, neuroendocrine tumours (of the stomach, intestines, appendix, pancreas and lung), intra-hepatic cholangiocarcinoma, Merkel cell carcinoma, uterine sarcomas and adrenal cortex tumours. The addition of *Mucosal malignant melanomas is especially significant* for the otolaryngology community, who have known for a long time that the behaviour of mucosal melanoma of the head and neck differs from skin melanoma. Reflecting the aggressive nature of this disease, no stage I and II mucosal melanomas are recognised. Tumour of any size limited to the epithelium is stage 3 disease (Table 1).

Generic changes

There have also been some changes that affect all cancer sites. The Mx category (distant metastases not assessed) has been removed. This has been done to ensure that fewer patients are excluded from the overall staging, as it is now judged that physical examination alone is sufficient to assess evidence of metastases in several body systems. The pMx category also has been removed. If clinical and radiological assessments show no metastases, the M stage should be recorded as cM0. When clinically detected metastases (cM1) are proven to be non-cancerous on histology, the patient should be restaged as cM0 and not pM0; the latter category exists only at autopsy. The pM1 category is to be used only when metastases are proven histologically.

Clarifications of histopathological reporting have also been included as optional descriptors. Perineural invasion (Pn1) has been added, in addition to lymphatic and venous invasion seen in the previous edition. Tumour deposits that are consistent with having replaced a lymph node completely are now to be recorded as a lymph node and should upstage the N stage as appropriate.

Lets delve into the realm of popular books, exploring the fascinating narratives that have charmed audiences this year. Tnm Classification Of Malignant Tumours 7th Edition : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.

Tnm Classification Of Malignant Tumours 7th Edition Introduction

In today's digital age, the availability of Tnm Classification Of Malignant Tumours 7th Edition books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of Tnm Classification Of Malignant Tumours 7th Edition books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of Tnm Classification Of Malignant Tumours 7th Edition books and manuals for download is the cost-saving

aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing Tnm Classification Of Malignant Tumours 7th Edition versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, Tnm Classification Of Malignant Tumours 7th Edition books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing Tnm Classification Of Malignant Tumours 7th Edition books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for Tnm Classification Of Malignant Tumours 7th Edition books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, Tnm Classification Of Malignant Tumours 7th Edition books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of Tnm Classification Of Malignant Tumours 7th Edition books

and manuals for download and embark on your journey of knowledge?
