

Water Conservation

Hovhannes Marukyan Extra Credit MGT 462/November 16, 2009 Water Conservation I have attended the presentation about water conservation techniques that each of us can use in our everyday life to ensure the sustainable development of resources and especially water. The presenter on the water conservation was a man who is in charge of the water preservation in Santa Monica. The presentation was very interesting and had great deal of information about proven water conservation tactics.

The topics covered included everything pertaining to consumer water usage and misuse. The topics included varied from water content in the soil to less water consuming showerheads to newer ways of watering the lawn. In order to understand the in-home usage one must first understand the nature of water usage in the global scale. He pointed out that most of the time societies use more water than needed. Some examples of places where people overuse water are in resorts, hydraulic dams, outdoor pools, basking in the showers, overflowing tubs, and so on.

What is interesting is that in order for water to get to us individually it needs to use energy to generate enough pressure, and if we use less water, hence we use less energy. Hydraulic dams use the most amount of water, and if we consume less energy we will use less water. Drying and cooling take the most amount of energy. His next topic in the presentation was about understood the Hydrologic cycle. The hydrologic cycle is when water on earth becomes dry enough and goes into the air as steam, than under right conditions when it's high enough in the atmosphere and it meets a with the cool air the steam becomes liquid and falls down as rain.

We dry up the air, from freeways, residential surfaces, and commercial surfaces, and if the air is not cold enough than the water will rarely liquefy. Now in order to battle this situation he presented with three possible solutions. First by cutting down on driving, with correlation of roof gardening we will to keep the air cool. Secondly we will save water by changing habits and fixtures, conserving water and energy. Third way is by reusing the water instead of throwing it away, this could be done by installing grey water systems.

It is when the dirty water is recycled instead of going to the ocean. Next step in the presentation was about how we as individuals can do to conserve water. He broke down water conservation into two parts, the indoor and the outdoor. What we can do indoors is to do the simple things, like not letting the water on when brushing our teeth, not taking extensive showers, not leaving the water on for hours and forgetting about it. Another easy way to use less water is putting a half full bottle of water in the back of the toilet to deter it from using a lot of water.

This is especially a good idea for old toilets models which in general use more water than needed. The best amount of water per flush is 1.5 GMP; the transit

Rigorous Reading, Texas Edition Douglas Fisher,Nancy Frey,2018-02-09 Newly revised and updated throughout this new

Texas Edition has been specially developed to align with the Texas Essential Knowledge and Skills standards. What it really means to read closely. What could Fern Arable, Jay Gatsby, and Winston Churchill possibly have in common? They all need masterful teachers to help students revel in their complexity. And Nancy Frey and Doug Fisher are just the two mentors to help you make that happen. Call it close reading, call it deep reading, call it analytic reading, call it what you like. The point is it is a level of understanding that students of any age can achieve with the right kind of instruction. In *Rigorous Reading*, Nancy and Doug articulate an instructional plan so clearly and so squarely built on research that teachers, schools, and districts need look no further. The 5 Access Points Toward Proficiency: Purpose, Modeling, Teachers think aloud to demonstrate critical thinking, and how good readers always know why they are reading. Close Scaffolded Reading Instruction: Teachers engage students in repeated readings and discussions with text-dependent questions, prompts, and cues to help students delve into an author's ideas. Collaborative Conversations: Teachers orchestrate collaborative learning to get students in the habit of exercising their analytical thinking in the presence of their peers. An Independent Reading Staircase: Teachers artfully steer students to more challenging books with strategic bursts of instruction and peer conferences to foster metacognitive awareness. Performance: Teachers offer feedback and assessments that help students demonstrate understanding of text in authentic ways and plan instruction based on student understanding. There's more. Also included are illustrative classroom video clips available via QR codes along with an online Facilitator's Guide with PowerPoints making *Rigorous Reading* the only resource a teacher, school, or district needs to seriously stretch students' capacity to read and comprehend text.
