Study Question or Term	Notes	Pictures & additional notes
What do waves do?	Waves carry <u>energy</u> , not <u>matter</u> .	Ex. string tied to the wall & moved, but doesn't travel the full distance of the wave
What determines if a wave is categorized as mechanical or electromagnetic?	<p>Mechanical- needs a <u>medium</u> (<u>solid</u>, <u>liquid</u>, <u>gas</u>) to travel through.</p> <p>Electromagnetic- can travel through <u>empty space</u></p>	<p>Mechanical Wave Ex: plus waves, made with string or jump ropes, water waves, earthquakes, sound</p> <p>Electromagnetic: types of radiation, visible and invisible light</p>
What are the two types of waves that are based on the way the energy makes particles (or fields) move?	<p>Transverse Wave</p> <ul style="list-style-type: none"> • Particles move <u>perpendicular</u> to the wave energy <u>direction</u> <ul style="list-style-type: none"> ↳ <u>up & down</u> or <u>side to side</u> • <u>Electromagnetic Wave</u> is two <u>transverse</u> waves caused by an <u>electric</u> and <u>magnetic</u> field interacting perpendicular to one another <p>Compression Wave</p> <p>↳ Also called <u>Longitudinal</u></p> <ul style="list-style-type: none"> • Particles move <u>forward</u> and <u>back</u>, <u>parallel</u> to the direction the energy travels 	<p>Transverse Wave Drawing</p>  <p>Electromagnetic Wave</p>  <p>Can produce Longitudinal Wave</p> 
Explain what the crest and the trough are and which type of wave they are found on.	<p><u>Transverse</u> wave</p> <ul style="list-style-type: none"> • Crest = <u>high</u> point • Trough = <u>low</u> point

Minds-on Physics: Complex systems William J. Leonard, 1999 **Solutions of Exercises of The Mechanics of Lorentz Transformations** Taha Sochi, 2022-09-28 This book contains detailed solutions of all the exercises of my book The Mechanics of Lorentz Transformations The solutions are generally very detailed and hence they are supposed to provide some sort of revision for the subject topic *Wave Behavior in Reactive Flow Through Permeable Media* Steven Lawrence Bryant, 1986 **Mathematical Modelling & Computing in Biology and Medicine** V. Tamdgidi, 2020-01-20 In this major new study in the sociology of scientific knowledge social theorist Mohammad H Tamdgidi reports having unriddled the so called quantum enigma This book opens the lid of the Schrödinger's Cat box of the quantum enigma after decades and finds something both odd and familiar Not only the cat is both alive and dead it has morphed into an elephant in the room in whose interpretation Einstein Bohr Bohm and others were each both right and wrong because the enigma has acquired both localized and spread out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts The book offers in a transdisciplinary and transcultural sociology of self knowledge framework a relativistic interpretation to advance a liberating quantum sociology Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society This however necessarily leads us to confront an elephant in the room the quantum enigma In Unriddling the Quantum Enigma the first volume of the series commonly titled Liberating Sociology From Newtonian toward Quantum Imaginations sociologist Mohammad H Tamdgidi argues that unriddling the quantum enigma depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting or not the enigma itself for more than a century Once this veil is lifted and the enigma unriddled he argues it becomes possible to reinterpret the relativistic and quantum ways of imagining reality including social reality in terms of a unified nonreductive creative dialectic of part and whole that fosters quantum sociological imaginations methods theories and practices favoring liberating and just social outcomes The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma Following a survey of relevant studies and an introduction to the transdisciplinary and transcultural sociology of self knowledge framing the study overviews of Newtonianism relativity and quantum scientific revolutions the quantum enigma and its main interpretations to date are offered They are followed by a study of the notion of the wave particle duality of light and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma one that is shown to be capable of

critically cohering other offered interpretations The book concludes with a heuristic presentation of the ontology epistemology and methodology of what Tamdgidi calls the creative dialectics of reality The volume essays involve critical comparative integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field This study is the first in the monograph series Tayyeb Series in East West Research and Translation of Human Architecture Journal of the Sociology of Self Knowledge XIII 2020 published by OKCIR Omar Khayyam Center for Integrative Research in Utopia Mysticism and Science Utopystics OKCIR is dedicated to exploring in a simultaneously world historical and self reflective framework the human search for a just global society It aims to develop new conceptual methodological theoretical historical practical pedagogical inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world history and her his selves constitute one another Reviews Mohammad H Tamdgidi s Liberating Sociology From Newtonian Toward Quantum Imaginations Volume 1 Unriddling the Quantum Enigma hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science namely many practitioners allegiance consciously or otherwise to persisting conceptions of science that get in the way of scientific and other forms of theoretical advancement Newtonianism has achieved the status of an idol and its methodology a fetish the consequence of which is an ongoing failure to think through important problems of uncertainty indeterminacy multivariation multidisciplinary and false dilemmas of individual agency versus structure among many others Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering in effect a call for its teleological suspension thinking beyond disciplinary through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social including human understanding The implications are far reaching as they offer as the main title attests liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things social This is exciting work A triumph The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done Professor Lewis R Gordon Honorary President of the Global Center for Advanced Studies and author of Disciplinary Decadence Living Thought in Trying Times Routledge Paradigm 2006 and Freedom Justice and Decolonization Routledge forthcoming 2020 Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of time and space Mohammad H Tamdgidi has produced a tour de force in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non dualistic non reductionist transcultural transdisciplinary post Einsteinian quantum concept of TimeSpace Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos This book is a quantum leap in the social sciences at large Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews This book is a masterpiece in social
