Grammar for Teachers Andrea DeCapua, 2008-01-31 The purpose of Grammar for Teachers is to encourage readers to develop a solid understanding of the use and function of grammatical structures in American English. It approaches grammar from a descriptive rather than a prescriptive approach; however, throughout the book, differences between formal and informal language and spoken and written English are discussed. The book avoids jargon or excessive use of technical terminology. It makes the study of grammar interesting and relevant by presenting grammar in context and by using authentic material from a wide variety of sources.

Teaching Secondary and Middle School Mathematics Daniel J. Brahier, 2020-04-01 Teaching Secondary and Middle School Mathematics combines the latest developments in research, technology, and standards with a vibrant writing style to help teachers prepare for the excitement and challenges of teaching secondary and middle school mathematics. The book explores the mathematics teaching profession by examining the processes of planning, teaching, and assessing student progress through practical examples and recommendations. Beginning with an examination of what it means to teach and learn mathematics, the reader is led through the essential components of teaching, concluding with an examination of how teachers continue with professional development throughout their careers. Hundreds of citations are used to support the ideas presented in the text, and specific websites and other resources are presented for future study by the reader. Classroom scenarios are presented to engage the reader in thinking through specific challenges that are common in mathematics classrooms. The sixth edition has been updated and expanded with particular emphasis on the latest technology resources and standards. The reader is introduced to the ways that students think and how to best meet their needs through planning that involves attention to differentiation, as well as how to manage a classroom for success. Features include: The entire text has been reorganized so that assessment takes a more central role in planning and teaching. Unit 3 of 5 now addresses the use of summative and formative assessments to inform classroom teaching practices. A new feature, Links and Resources, has been added to each of the 13

words of Carl Glickman is one of America's seminal thinkers about public education. For over four decades he has been a voice of much needed skepticism about our plans for school reform, teacher training, and educational psychology. Now, for the first time, Sarason's essential writings on these and other issues are collected together, offering student and researcher alike with the range, depth, and originality of Sarason's contributions to American thinking on schooling. As we go from debate to debate on issues such as school choice, charter schools, inclusive education, national standards, and other problems that seem to drag on without solution, Sarason's critical stance on the folly of many of our attempts to fix schools has always had at the center a concern for the main players in our educational institutions: the students, the teachers, and the parents. Any plans that cannot account for their well-being are doomed to failure. And in the face of such failure, the clarity of Sarason's vision for real educational success is a much needed antidote to much of the rhetoric that currently passes for substantial debate. A wide-ranging and comprehensive selection of Sarason's most significant writings, *The Skeptical Visionary* should find a prized space on any student's or teacher's bookshelf.

Author note: Robert Fried is Associate Professor in the School of Education at Northeastern University and is the author of *The Passionate Teacher: A Practical Guide* and *The Passionate Learner: How Teachers and Parents Can Help Children Reclaim the Joy of Discovery*. Seymour Sarason is Professor Emeritus in the Department of Psychology at Yale University. He is the author of over forty books and is considered to be one of the most significant researchers in education and educational psychology in the country.
