health specialist Dr Mosconi unravels these mysteries by revealing how menopause doesn't just impact the ovaries it's a hormonal show in which the brain takes center stage. The decline of the hormone estrogen during menopause influences everything from body temperature to mood to memory potentially paving the way for cognitive decline later in life. To conquer these challenges successfully Dr Mosconi brings us the latest approaches explaining the role of cutting edge hormone replacement therapies like designer estrogens hormonal contraception and key lifestyle changes encompassing diet exercise self care and self talk. Best of all Dr Mosconi dispels the myth that menopause signifies an end demonstrating that it's actually a transition.
