The Oxford History of Classical Reception in English Literature Rita Copeland, 2016-01-28 The Oxford History of Classical Reception in English Literature OHCREL is designed to offer a comprehensive investigation of the numerous and diverse ways in which literary texts of the classical world have stimulated responses and refashioning by English writers Covering the full range of English literature from the early Middle Ages to the present day OHCREL both synthesizes existing scholarship and presents cutting edge new research employing an international team of expert contributors for each of the five volumes OHCREL endeavours to interrogate rather than inertly reiterate conventional assumptions about literary periods the processes of canon formation and the relations between literary and non literary discourse It conceives of reception as a complex process of dialogic exchange and rather than offering large cultural generalizations it engages in close critical analysis of literary texts It explores in detail the ways in which English writers engagement with classical literature casts as much light on the classical originals as it does on the English writers own cultural context This first volume and fourth to appear in the series covers the years c 800 1558 and surveys the reception and transformation of classical literary culture in England from the Anglo Saxon period up to the Henrician era Chapters on the classics in the medieval curriculum the trivium and quadrivium medieval libraries and medieval mythography provide context for medieval reception The reception of specific classical authors and traditions is represented in chapters on Virgil Ovid Lucan Statius the matter of Troy Boethius moral philosophy historiography biblical epics English learning in the twelfth century and the role of antiquity in medieval alliterative poetry The medieval section includes coverage of Chaucer Gower and Lydgate while the part of the volume dedicated to the later period explores early English humanism humanist education and libraries in the Henrician era and includes chapters that focus on the classicism of Skelton Douglas Wyatt and Surrey

Ancient and medieval labyrinths embody paradox according to Penelope Reed Doob Their structure allows a double perspective the baffling fragmented prospect confronting the maze treader within and the comprehensive vision available to those without Mazes simultaneously assert order and chaos artistry and confusion articulated clarity and bewildering complexity perfected pattern and hesitant process In this handsomely illustrated book Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth from the classical period through the Middle Ages Doob first examines several complementary traditions of the maze topos showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity She then describes two common models of the labyrinth and explores their formal implications the unicursal model with no false turnings found almost universally in the visual arts and the multicursal model with blind alleys and dead ends characteristic of literary texts This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze as Doob s examination of a vast array of materials from the classical period through the Middle Ages suggests She concludes with linked readings of four labyrinths of words Virgil s Aeneid Boethius Consolation of Philosophy Dante s Divine Comedy and Chaucer s House of Fame each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works Readers in such fields as Classical literature Medieval Studies Renaissance Studies comparative literature literary theory art history and intellectual history will welcome this wide ranging and illuminating book

Variants and Variance in Classical Textual Cultures Glenn W. Most, 2024-08-19 Given the limited durability of most textual supports texts must be reproduced if they are to survive And given the proliferation over time of users practices and places which need to have access to the texts that are important for cultural institutions this is particularly true for authoritative texts But the reproduction of texts by traditional means either orally or by hand inevitably produces variations These variations can arise because of inattention confusion misunderstanding deliberate modification physical damage and many other factors In general the more a text is reproduced the more variations are likely to occur But although the fact of textual variation in general is doubtless an anthropological universal the specific forms it takes and the specific attitudes to its occurrence seem to vary widely from culture to culture How variations develop in different cultures on the basis of which forms of scholarly practices collaborations and institutional frameworks what variants say about a culture s understandings of text authorship and collective authorship what happens when variants become

creative and generate their own strands of tradition to what degree changes in transmission media and processes of distribution translations or the migration of texts into different cultural or institutional contexts can influence or be influenced by the development of variants these are the questions that this book addresses in a historical and culturally comparative perspective
