Disposable Cities Garth Andrew Myers,2017-03-02 Based on in depth fieldwork in three cities Dar es Salaam Zanzibar and Lusaka this book provides a critical analysis of the United Nations Sustainable Cities Program in Africa SCP Focusing on the SCP s policies for solid waste management which was identified as the top priority problem by the SCP the book examines the success of these pilot

schemes and the SCP's record in building new relationships between people and government. It argues that the SCP has operated in a political vacuum without recognition of the long and problematic histories and cultural politics of urban environmental governance in Eastern and Southern Africa. This book brings these cultural and political histories to the fore in its examination of the contemporary dynamics. In doing so, it not only provides an insightful analysis of the policies and outcomes for the SCP but also puts forward a historically grounded critique of neoliberalism, good governance and sustainable development discourses. *Biblio List Updates in Print*, 1994 **Rural Development Abstracts**, 1994

Challenges of African Growth B. J. Ndulu, 2007. Poverty in Africa is largely the outcome of slow growth. With the region hosting 10 percent of the world's population but a staggering 30 percent of the world's poor, the challenges it faces are enormous but NOT insurmountable. The message of this book is clear: poverty eradicating development in Africa is possible. In fact, there are indications that Africa is at a turning point and there is growing momentum among front runner economies in the region toward higher and sustained growth. This study challenges African countries and their development partners to consolidate and continue this momentum and to exploit the advantages of the continent as a latecomer, particularly in innovation and in drawing lessons from successful export led growth experiences in Asia and Latin America. *Challenges of African Growth* identifies opportunities, constraints and strategic choices that African countries face in their quest for achieving the growth necessary for poverty alleviation. More important, the study provides a broad menu of strategic options for ensuring not only that countries embark on a growth path but also that the growth is shared and sustainable. The critical areas for action rest on four pillars: the investment climate, infrastructure, innovation for increasing productivity and competitiveness, and institutional capacity. *Sustainable Management of Indigenous Forests in the Dry Tropics* P.
