## **The Naked Sun:**

*The Naked Sun* Isaac Asimov, 2011-04-13 The bestselling Robot series continues in this sequel to *The Caves of Steel* with detective Elijah Baley taking on the dangerous role of double agent when he is sent to Solaria to solve a brutal murder and uncover a weakness in Earth's most powerful neighbor. On the beautiful Outer World planet of Solaria a handful of human colonists lead a hermit-like existence; their every need attended to by their faithful robot servants. To this strange and provocative planet comes Detective Elijah Baley sent from the streets of New York with his positronic partner the robot R Daneel Olivaw to solve an incredible murder that has rocked Solaria to its foundations. The victim had been so reclusive that he appeared to his associates only through holographic projection. Yet someone had gotten close enough to bludgeon him to death while robots looked on. Now Baley and Olivaw are faced with two clear impossibilities: Either the Solarian was killed by one of his robots (unthinkable under the laws of Robotics) or he was killed by the woman who loved him so much that she never came into his presence. Isaac Asimov's Robot series chronicles the sometimes uneasy partnership between human and humanoid. I ROBOT THE CAVES OF STEEL THE NAKED SUN THE ROBOTS OF DAWN

The Naked Sun Isaac Asimov, 1993 Science fiction roman

**The Naked Sun** Isaac Asimov, 1957

**The Naked Sun** Isaac Asimov, 1981-05-12 Classic science fiction from an acclaimed master of the genre. On the planet Solaria robots outnumber the strictly controlled human population by twenty to one. A visitor from Earth involved in a murder investigation offers a perspective on a society in which personal contact is avoided; communication is by holographic telepresence.

Deep Space Flight and Communications Claudio Maccone, 2009-06-09 The majority of books dealing with prospects for interstellar flight tackle the problem of the propulsion systems that will be needed to send a craft on an interstellar trajectory. The proposed book looks at two other equally important aspects of such space missions and each forms half of this two part book. Part 1 looks at the ways in which it is possible to exploit the focusing effect of the Sun as a gravitational lens for scientific missions to distances of 550 AU and beyond into interstellar space. The author explains the mechanism of the Sun as a gravitational lens, the scientific investigations which may be carried out along the way to a distance of 550 AU and at the 550 AU sphere itself, the requirements for exiting the Solar System at the highest speed and a range of project ideas for missions entering interstellar space. Part 2 of the book deals with the problems of communicating between an interstellar spaceship and the Earth especially at very high speeds. Here the author assesses a range of mathematical tools relating to the Karhunen-Loève Transform (KLT) for optimal telecommunications, technical topics that may one day enable humans flying around the Galaxy to keep in contact with the Earth. This part of the book opens with a summary of the author's 2003 Pelek Lecture presented at the IAC in Bremen which introduces the concept of KLT for engineers and newcomers to the subject. It is planned to include a DVD containing the full mathematical derivations of the KLT for those interested in this important mathematical tool, whilst the text itself will contain the various results without outlines of the mathematical proofs.

Astronautical engineers will thus be able to see the application of the results without getting bogged down in the mathematics. **The Caves of Steel** Isaac Asimov, 2011-04-13 Following the iconic *I Robot*, the next adventure in the Robot series finds detective Elijah Baley swept into one of the most emotionally charged and dangerous situations in Earth's history when he's tasked with solving the murder of an illustrious robot scientist. With his fertile imagination, his wit, and his prolific output, Isaac Asimov truly laid the foundation for all future generations of science fiction writers. Kevin J. Anderson, New York Times bestselling co-author of the *Dune* prequel series. Like most people left behind on an overpopulated Earth, New York City police detective Elijah Baley had little love for either the arrogant Spacers or their robotic companions. But when a prominent Spacer is murdered under mysterious circumstances, Baley is ordered to the Outer Worlds to help track down the killer. The relationship between Baley and his Spacer superiors, who distrusted all Earthmen, was strained from the start. Then he learned that they had assigned him a partner, R. Daneel Olivaw. Worst of all was that the R stood for robot, and his positronic partner was made in the image and likeness of the murder victim. Isaac Asimov's Robot series chronicles the sometimes uneasy partnership between human and humanoid. *I, ROBOT*, *THE CAVES OF STEEL*, *THE NAKED SUN*, *THE ROBOTS OF DAWN*.
