**Campaign Crossroads** Andrew E.

Stoner, 2017-06-30 Campaign Crossroads looks back over the varied sometimes important sometimes irrelevant but always interesting presidential campaign cycles in Indiana's history. By taking in the influences of technology, transportation, and communication itself, we see an evolution in the political process that is not only altogether Hoosier but also altogether American in its quality and importance. Using a narrative approach with a mix of primary and secondary sources, the work examines not only the rhetoric of presidents and presidential hopefuls but also the nature of campaigns and their impact on Indiana communities. While Indiana enjoyed the position of being a battleground state for the better part of a century from the 1870s until the 1960s, it has also been ignored, dismissed, and has on occasion created unexpected political drama.

The Rise and Fall of Social Cohesion Christian Albrekt Larsen, 2013-06-20 The book explores the ways in which social cohesion, measured as trust in unknown fellow citizens, can be established and undermined. It examines the US and UK where social cohesion declined in the latter part of the twentieth century, and Sweden and Denmark where social cohesion increased, and aims to put forward a social constructivist explanation for this shift. Demonstrating the importance of public perceptions about living in a meritocratic middle-class society, the book argues that trust declined because the Americans and British came to believe that most other citizens belong to an untrustworthy, undeserving, and even dangerous bottom of society rather than to the trustworthy middle classes. In contrast, trust increased amongst Swedes and Danes as they believed that most citizens belong to the middle of society rather than to the bottom. Furthermore, the Swedes and Danes came to view the perceived narrow bottom of their society as trustworthy, deserving, and peaceful. The book argues that social cohesion is primarily a cognitive phenomenon, in contrast to previous research which has emphasized the presence of shared moral norms, fair institutions, networks, engagement in civil society, etc. The book is based on unique empirical data material where American survey items have been replicated in the British Social Attitude survey and the Danish and Swedish ISSP surveys.

exclusively for this book It also includes a unique cross national study of media content covering a five year period in UK Sweden and Denmark It demonstrates how the bottom and the middle is differently constructed across countries Modern World History for Edexcel Specification A, Nigel Kelly,2001 This student book is a foundation edition of the syllabus specific text for GCSE Modern World History for Edexcel This text provides a simplified version of the core textbook and is targeting students expecting to gain C to G grades *Foundations of Public Service* Douglas F Morgan,Douglas F.
