The Onlife Manifesto Being Human In A Hyperconnected Era:

The Onlife Manifesto Luciano Floridi, 2014-11-16 What is the impact of information and communication technologies ICTs on the human condition In order to address this question in 2012 the European Commission organized a research project entitled The Onlife Initiative concept reengineering for rethinking societal concerns in the digital transition This volume collects the work of the Onlife Initiative It explores how the development and widespread use of ICTs have a radical impact on the human condition ICTs are not mere tools but rather social forces that are increasingly affecting our self conception who we are our mutual interactions how we socialise our conception of reality our metaphysics and our interactions with reality our agency In each case ICTs have a huge ethical legal and political significance yet one with which we have begun to come to terms only recently The impact exercised by ICTs is due to at least four major transformations the blurring of the distinction between reality and virtuality the blurring of the distinction between human machine and nature the reversal from information scarcity to information abundance and the shift from the primacy of stand alone things properties and binary relations to the primacy of interactions processes and networks Such transformations are testing the foundations of our conceptual frameworks Our current conceptual toolbox is no longer fitted to address new ICT related challenges This is not only a problem in itself It is also a risk because the lack of a clear understanding of our present time may easily lead to negative projections about the future The goal of The Manifesto and of the whole book that contextualises is therefore that of contributing to the update of our philosophy It is a constructive goal The book is meant to be a positive contribution to rethinking the philosophy on which policies are built in a hyperconnected world so that we may have a better chance of understanding our ICT related problems and solving them satisfactorily The Manifesto launches an open debate on the impacts of ICTs on public spaces politics and societal expectations toward policymaking in the Digital Agenda for Europe s remit More broadly it helps start a reflection on the way in which a hyperconnected world calls for rethinking the referential frameworks on which policies are built

The Onlife Manifesto Luciano Floridi, 2014-12-31 *Hyperconnectivity and Digital Reality* Kathrin Otreel-Cass, 2019-08-23 This book addresses the topic of hyperconnectivity by building on expanding and critically examining issues that have to do with information communication technology ICT and networked societies The book explores questions relating to attention and consciousness techno capitalism and communicative action taking Adopting different philosophical angles to assess the challenges we face due to our entanglement with hyperconnected technologies the book studies performance and performativity in a digitised world by considering the unfolding of our onlife and by looking at what this means to educated future scientists and engineers in a hyperconnected world The book further discusses digital activities as the new constructs of ourselves and poses questions about how much literacy is needed for us not to be enslaved by those constructs The book also explores the challenges of hyperconnectivity and the health sector to showcase the vulnerabilities we are increasingly exposed to It makes clear that since the boundaries between on and offline are

becoming increasingly blurred we will require new flexible frameworks that reconsider what it means to be human in a hyperconnected world *Design Thinking for Digital Well-being* Fiona C. Karol Jan Borowiecki, Neil Forbes, Antonella Fresca, 2016-05-02 The central purpose of this collection of essays is to make a creative addition to the debates surrounding the cultural heritage domain In the 21st century the world faces epochal changes which affect every part of society including the arenas in which cultural heritage is made held collected curated exhibited or simply exists The book is about these changes about the decentring of culture and cultural heritage away from institutional structures towards the individual about the questions which the advent of digital technologies is demanding that we ask and answer in relation to how we understand collect and make available Europe s cultural heritage Cultural heritage has enormous potential in terms of its contribution to improving the quality of life for people understanding the past assisting territorial cohesion driving economic growth opening up employment opportunities and supporting wider developments such as improvements in education and in artistic careers Given that spectrum of possible benefits to society the range of studies that follow here are intended to be a resource and stimulus to help inform not just professionals in the sector but all those with an interest in cultural heritage **Intelligent and Autonomous: Transforming Values in the Face of Technology**

, 2023-08-28 This book uses case analyses and industry insights and blends them with forays into philosophy and ethics to conceptualise the mismatch between human values and the values inherent in an increasingly technologized world Bringing together contributors from the disciplines of law politics philosophy and communication studies this volume develops an interdisciplinary vocabulary for thinking about the questions and antinomies of human technology interaction while also resisting any deceptively straightforward synthesis The topics discussed include the competition over and regulation of

technology the harm induced by autonomous technologies and the place and role of humans in a world that is undergoing rapid and radical change Malleable, Digital, and Posthuman Ignas Kalpokas, 2021-09-10 This book proposes a posthumanist research methodology for future research in the areas of the economy the human self politics and research ethics providing a novel explanatory and methodological framework for studying today's world **Legal Issues in the Digital Economy** Federico Costantini, Anthony Forsyth, 2019-08-01 It is a matter of fact that technological innovation is deeply impacting on our culture society economy and labour market The massive and widespread use of Artificial Intelligence and the strengthening of the collaborative economy also known as gig or platform economy are blurring the traditional legal categories and creating new requirements for protection for employed and self employed workers This book represents a tool to understand where we are and where we are going focusing on old and new legal categories and labour market policies The chapters included in this volume cover different disciplines such as legal informatics labour law social security law civil law and tort law in order to offer scholars and legal specialists an overall view of ongoing changes challenges and opportunities from a European Union law perspective *The Digital Citizenship in the European Union framework. Political, Economic, Sociological, and Legal Issues* Raffaele Torino, 2024-12-31 Fra i principali risultati del Modulo Jean Monnet La Cittadinanza Digitale per l'Unione Europea coordinato da Raffaele Torino il volume analizza il tema della cittadinanza digitale nel contesto del processo di integrazione europea non solo da una prospettiva giuridica ma anche nei suoi aspetti politici economici e sociologici La scelta metodologica di ricercare e insegnare la Cittadinanza Digitale attraverso una pluralità di approcci epistemologici si rivela la naturale conseguenza dell'attitudine degli studenti di Scienze Politiche a costruire il proprio sapere in maniera multidisciplinare Il volume esplora molteplici sfaccettature della cittadinanza digitale e l'impatto della digitalizzazione sulle relazioni di cittadinanza intese in senso ampio in una realtà in continua evoluzione sebbene ormai non più del tutto nuova di relazioni giuridiche economiche e sociali in cui l'individuo europeo diventa cittadina e cittadino di un mondo digitale DOI 10.13134/979.12.5977.403.3 *Subjectivity Transformed* Thomas Vesting, 2023-11-28 This book provides a historically informed reconstruction of the social practices that have shaped the formation of the modern subject from the early modern period to the present The formal legal protections accorded to subjects are and always have been latent in social practices norms and language before they are articulated in formal legal orders Vesting argues that in Western societies legal personhood is closely tied to three ideal types of social personhood what he calls the gentleman the manager and Homo digitalis By examining these three ideal types and their emergence in society we can see that Western formal law does not bring these ideal types into being but on the contrary they arise from the social and cultural conditions that they generate and reflect Correspondingly Western legal personhood or legal subjectivity arises from the history and culture of Western nations not the other way around Therefore signature features of Western formal law particularly its valorization of the rights of persons whether natural or nonnatural come from the particular sociohistorical cultural

developments that had already generated the strong ideas of social personhood inherent in the ideal types of the gentleman the manager and Homo digitalis Subjectivity Transformed is a major contribution to legal and social theory and with its original analysis of the formation of modern subjectivity it will be of interest to students and scholars throughout the social sciences and humanities

Future Politics Jamie Susskind, 2018-09-12 Future Politics confronts one of the most important questions of our time how will digital technology transform politics and society The great political debate of the last century was about how much of our collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self driving cars that refuse to drive over the speed

limit Those who control these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control
