Global Jurisprudential Apartheid in the Twenty-First Century Howard Tafara Chitimira, Artwell Nhemachena, Tapiwa Victor Warikandwa, 2021-09-27 In *Global Jurisprudential Apartheid in the Twenty First Century* Universalism and Particularism in International Law the contributors argue that the world is witnessing the formation of a global jurisprudential apartheid despite the promotion of democracy equality human rights and humanitarianism Examining organisations such as international criminal courts the World Trade Organisation the United Nations Security Council the International Monetary Fund and the World Bank the contributors unpack the challenges of global jurisprudential apartheid In particular they analyse the ways in which these organizations hold and contribute to the increasing inequalities between the Global North and the Global South Ultimately *Global Jurisprudential Apartheid in the Twenty First Century* shows that globalisation is a variant of the apartheid era particularism and not universalism working to advantage the Global North while disadvantaging the Global South under the pretense of humanitarianism

Ecological Sustainability for Non-timber Forest Products Charlie M. Shackleton, Ashok K. Pandey, Tamara Ticktin, 2015-03-24 There is growing knowledge about and appreciation of the importance of Non timber Forest Products NTFPs to rural livelihoods in developing countries and to a lesser extent developed countries However there is also an assumption on the part of policy makers that any harvesting of wild animal or plant products from the forests and other natural and modified ecosystems must be detrimental to the long term viability of target populations and species This book challenges this idea and shows that while examples of such negative impacts certainly exist there are also many examples of sustainable harvesting systems for NTFPs The chapters review and present coherent and scientifically sound information and case studies on the ecologically sustainable use of NTFPs They also outline a general interdisciplinary approach for assessing the sustainability of NTFP harvesting systems at different scales A wide range of case studies is included from Africa Asia and South America using plant and animal products for food crafts textiles medicines and cosmetics

The Handbook of Social Work and Social Development in Africa Mel Gray, 2016-10-26 All recent books on international social work mention Africa only briefly and few engage with the broader field of development studies This book focuses solely on the unique African context engaging with issues relating to social work and development more broadly thus enabling a deeper examination and more complex and nuanced picture to emerge Unlike most academic works this book highlights multiple practitioner voices with authors or co authors that have recently been or are currently practising social workers As an edited book it draws from both academic research as well as lived practice experience supported by strong theoretical positioning and guidance in introductory chapters drawing on African literature wherever possible Looking at case studies from Lesotho Botswana Kenya Zimbabwe Ethiopia Namibia Uganda Nigeria Kenya South Africa Rwanda Zambia and Tanzania and covering established areas of practice such as child protection working with older people working with people with disabilities mental health and mainstream services targeting women as well as emerging areas of developmental social work practice such as humanitarian assistance in post conflict situations work with immigrants and refugees and the training of

community based workers this book takes a future oriented perspective that aims to move beyond well worn critiques to envision constructive and sustainable futures for social work and social development in Africa from a critical perspective

Geo-economics and Power Politics in the 21st Century Mikael Wigell, Sören Scholvin, Mika Aaltola, 2018-07-06

Starting from the key concept of geo economics this book investigates the new power politics and argues that the changing structural features of the contemporary international system are recasting the strategic imperatives of foreign policy practice States increasingly practice power politics by economic means Whether it is about Iran s nuclear programme or Russia s annexation of Crimea Western states prefer economic sanctions to military force Most rising powers have also become cunning agents of economic statecraft China for instance is using finance investment and trade as means to gain strategic influence and embed its global rise Yet the way states use economic power to pursue strategic aims remains an understudied topic in International Political Economy and International Relations The contributions to this volume assess geo economics as a form of power politics They show how power and security are no longer simply coupled to the physical control of territory by military means but also to commanding and manipulating the economic binds that are decisive in today s globalised and highly interconnected world Indeed as the volume shows the ability to wield economic power forms an essential means in the foreign policies of major powers In so doing the book challenges simplistic accounts of a return to traditional military driven geopolitics while not succumbing to any unfounded idealism based on the supposedly stabilising effects of interdependence on international relations As such it advances our understanding of geo economics as a strategic practice and as an innovative and timely analytical approach This book will be of much interest to students of security studies international political economy foreign policy and International Relations in general

Study on impacts of farmer-led research supported by civil society organizations Wettasinha, C., Waters-Bayer, A., van Veldhuizen, L., Quiroga, G., Swaans, K., 2015-01-15

Decades of scientific research related to agriculture and natural resource management have brought limited benefits to smallholder farmers including crop farmers fishers livestock keepers and other resource users Therefore donors policymakers and civil society organizations CSOs such as farmer organizations and nongovernmental organizations NGOs are urging the formal research sector to make its work more useful to smallholder farmers Many institutions of agricultural research and development are now seeking ways to engage more closely with smallholders in order to conduct research that is more relevant for and accessible to them and are seeking examples and good practices as sources of learning Some examples of research that is focused on smallholders and in which the process is co managed and driven by smallholders can be found in informal research initiatives specifically those which are facilitated by CSOs The purpose of this study was to identify such examples of informal agricultural research and development that could be documented and thus made accessible to formal researchers This report also describes farmer led research findings and their dissemination and analyzes available evidence on the impact of farmer led approaches to agricultural research and development on rural livelihoods local

The Despot's Accomplice Brian Klaas, 2018-05-01 For the first time since the end of the Cold War the world is steadily becoming less democratic The true culprits are dictators and counterfeit democrats But argues Klaas the West is also an accomplice inadvertently assaulting pro democracy forces abroad as governments in Washington London and Brussels chase pyrrhic short term economic and security victories Friendly fire from Western democracies against democracy abroad is too high a price to pay for a myopic foreign policy that is ultimately making the world less prosperous stable and democratic The Despot's Accomplice draws on years of extensive interviews on the frontlines of the global struggle for democracy from a poetry reading politician kidnapping general in Madagascar to Islamist torture victims in Tunisia Belarusian opposition activists tailed by the KGB West African rebels and tea sipping members of the Thai junta Cumulatively their stories weave together a tale of a broken system at the root of democracy's global retreat

that shows how the rank has evolved over time **Ordered Estates** Hartnack, Andrew M.C.,2016-07-31 There is a growing body of work on white farmers in Zimbabwe Yet the role played by white women so called farmers wives on commercial farms has been almost completely ignored if not forgotten For all the public role and overt power ascribed to white male farmers their wives played an equally important although often more subtle role in power and labour relations on white commercial farms This soft power took the form of maternalistic welfare initiatives such as clinics schools orphan programmes and women s clubs mostly overseen by a farmer s wife Before and after Zimbabwe s 1980 independence these played an important role in attracting and keeping farm labourers and governing their behaviour After independence they also became crucial to the way white farmers justified their continued ownership of most of Zimbabwe s prime farmland This book provides the first comprehensive analysis of the role that farm welfare initiatives played in Zimbabwe s agrarian history Having assessed what implications such endeavours had for the position and well being of farmworkers before the onset of fast track land reform in the year 2000 Hartnack examines in vivid ethnographic detail the impact that the farm seizures had on the lives of farmworkers and the welfare programmes which had previously attempted to improve their lot
