*Validating Technological Innovation* David Coniam, Peter Falvey, 2016-04-02 This book discusses Hong Kong's use of onscreen marking OSM in public examinations. Given that Hong Kong leads the way in OSM innovation, this book has arisen from a recognised need to provide a comprehensive coherent account of the findings of various separate but linked validation studies of onscreen public examinations in Hong Kong. The authors discuss their experience of the validation process, demonstrating how high stakes innovation should be fully validated by a series of research studies in order to satisfy key stakeholders.

The World of Science Education Femi S. Otulaja, Meshach B. Ogunniyi, 2017-09-12 Each volume in the 7 volume series *The World of Science Education* reviews research in a key region of the world. These regions include North America, South and Latin America, Asia, Australia and New Zealand, Europe and Israel, North Africa and the Middle East, and Sub-Saharan Africa. The focus of this Handbook is on research in science education in mostly former British colonies in Sub-Saharan Africa and the scholarship that most closely support this program. The reviews of the research situate what has been accomplished within a given field in Sub-Saharan Africa rather than an international context. The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education. The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts. The approach allows readers to review what has been done and accomplished, what is missing, and what might be done next.

International Handbook of Mathematical Learning Difficulties Annemarie Fritz, Vitor Geraldi Haase, Pekka Räsänen, 2019-01-30 This comprehensive volume provides teachers, researchers, and education professionals with cutting edge knowledge developed in the last decades by the educational, behavioural, and neurosciences, integrating cognitive, developmental, and socioeconomic approaches to deal with the problems children face in learning mathematics. The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades, but the most part of this research has been conducted in non-applied settings, and there is still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings. Now it is time to bring the results from the laboratory to the classroom. Apart from bringing the theoretical discussions to educational settings, the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments. It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues. And it does so from an international perspective, dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world. All of this makes the *International Handbook of Mathematical Learning Difficulties* an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society.

UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis

on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report shows the entire array of approaches to accountability in education It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all The report emphasizes that education is a shared responsibility While governments have primary responsibility all actors schools teachers parents students international organizations private sector providers civil society and the media 0 3 have a role in improving education systems The report emphasized the importance of transparency and availability of information but urges caution in how data are used It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions In an era of multiple accountability tools the report provides clear evidence on those that are working and those that are not Back cover *Sustainable and Dynamic Graduate Employability* Mona

Khare,2023-09-22 This volume presents a theoretical and strategic discussion on the linkages between sustainable graduate employability skill building and economic growth With case studies from India South Africa Zimbabwe Taiwan England Germany the United States United Arab Emirates Australia and Asian countries it looks at the skills training and education landscape around the continents examines the state of employment and offers case specific recommendations The book analyses the role of higher education and vocational education policies and strategies in integrating skill training in education in order to achieve quality education and sustainable employment for all An important critique of skills training education policy and employment planning the volume will be an essential read for scholars and researchers of sustainable development development studies public policy political economy labour studies and education It will also be useful for policymakers *African Indigenous Knowledge and the Sciences* Gloria Emeagwali,Edward Shizha,2016-07-08 This book is

an intellectual journey into epistemology pedagogy physics architecture medicine and metallurgy The focus is on various dimensions of African Indigenous Knowledge AIK with an emphasis on the sciences an area that has been neglected in AIK discourse The authors provide diverse views and perspectives on African indigenous scientific and technological knowledge that can benefit a wide spectrum of academics scholars students development agents and policy makers in both governmental and non governmental organizations and enable critical and alternative analyses and possibilities for understanding science and technology in an African historical and contemporary context **Cracking the code**

This book by renowned scholar Dr Abdul Karim Bangura combines linguistics and mathematics to show how and why African centred mathematical ideas can be a driving force in Africa s development efforts Bangura explores the concept that Africa has been the centre of the History of Mathematics for thousands of years as the civilizations that emerged across the continent developed contributions which would enrich both ancient and modern understanding of nature through mathematics However scholars and other professionals working in the field of mathematics education in Africa have identified a plethora of issues in carrying out their tasks This is highlighted by one of the most compelling arguments in the book which is that a major reason for these problems is the fact that the African mother tongues has been greatly neglected in the teaching of mathematics in the continent Bangura asserts that a change has to be made in order for Africa to benefit from the exceptional opportunities mathematics offer showing that even if there is a great body of work connecting linguistics and mathematics few analyses have been performed on the link between African languages and mathematics and the ones that have been made are not theoretically grounded on linguistics Thus the book begins by identifying the objects of study of linguistics and mathematics and delineates which ones they have in common Next since the object of study of linguistics is language the nine design features of language are employed to examine each of the objects as it pertains to African languages After that mathematical ideas of sustainability and those of tipping points are suggested as means to help Africa s development efforts      JPSC - Jharkhand Public Service Commission General Studies Preliminary Examination—2024 Paper-I & Paper-II Dr. Manish Rannjan, IAS,2024-01-19 Excel in the JPSC General Studies Preliminary Examination 2024 with this guide featuring Paper I Paper II offering comprehensive coverage of exam topics and question formats The presented book JPSC General Studies Preliminary Examination 2024 Paper I Paper II thoroughly written on the basis of latest syllabus The book is divided into two main parts Paper I General Studies I and Paper II General Studies II In part I of the book subjects comprise as History of India Geography of India Indian Polity Governance Economic Sustainable development Science Technology National International Current Events and General Questions of Miscellaneous Nature In part II the book deals with all about Jharkhand as History of Jharkhand Jharkhand Movement Unique Identity of Jharkhand Folk Culture Dance Music Instruments Tourist Places Jharkhand Literature and Litterateur Major Educational Institute Sports Land Related Law History of Economic Development Major Schemes Forest management Wild life Conservation work Environment Adaptation Disaster Management Miscellaneous Fact along with Current Event etc The book has taken into consideration the most of the core topics of aspirants The book is extremely useful for the candidates preparing competitive exams and wishing to achieve the goal with high dreams      Research Anthology on Inclusive Practices for Educators and Administrators in Special Education Management Association, Information Resources,2021-09-24 Inclusion in the classroom is a growing phenomenon that covers a range of areas and subjects with prominent discussions about race gender sexual

orientation and age today's world is increasingly focused on making sure education is designed so everyone can succeed. Inclusivity in special education is particularly important as special education covers a wide range of students including those with physical, intellectual, and behavioral disabilities. As more research and information surrounding best practices, new technologies, and teacher education for special education is considered, it is imperative that teachers and administrators remain up to date on these innovative techniques. *The Research Anthology on Inclusive Practices for Educators and Administrators in Special Education* is a critical reference source that includes abundant research on all aspects of inclusion in special education as well as the latest trends, research, and studies to provide a comprehensive look at the current state of special education. Covering topics such as accessibility, educational models, teacher training, and assistive technologies, it is ideal for special education teachers, academicians, in-service teachers, pre-service teachers, professors, students, researchers, professionals, administrators, curriculum developers, instructional designers, and policymakers. **Gender and Identity**

**around the World** Chuck Stewart, 2020-11-09 This book provides an indispensable resource for high school and college students interested in the history and current status of gender identity formation and maintenance and how it impacts LGBTQ rights throughout the world. *Gender and Identity around the World* explores a variety of gender and LGBTQ experiences and issues in countries from all the world's regions. Guided by more than 50 recognized academic experts, readers will examine how gender and LGBTQ identities are developed, fought for, perceived, and policed in countries as diverse as France, Brazil, Russia, Jordan, Iraq, and China. Each chapter opens with a general introduction to a country or group of countries and flows into a discussion of gender and identity in terms of culture, education, family life, health, and wellness, law, work, and activism in that region of the world. A section on contemporary issues specific to the country or group of countries follows this discussion. *Social Computing, Behavioral-Cultural Modeling and Prediction* William G.

Kennedy, Nitin Agarwal, Shanchieh Jay Yang, 2014-03-14 This book constitutes the refereed proceedings of the 7th International Conference on Social Computing, Behavioral-Cultural Modeling and Prediction (SBP 2014) held in Washington, DC, USA, in April 2014. The 51 full papers presented were carefully reviewed and selected from 101 submissions. The SBP conference provides a forum for researchers and practitioners from academia, industry, and government agencies to exchange ideas on current challenges in social computing, behavioral-cultural modeling and prediction, and on state-of-the-art methods and best practices being adopted to tackle these challenges. The topical areas addressed by the papers are social and behavioral sciences, health sciences, military science, and information science. **African Migrants and the Refugee Crisis**

Olayiwola Abegunrin, Sabella O. Abidde, 2020-11-12 This book discusses African migration and the refugee crisis. Economic, political, and social tension in the Middle East and in many parts of the Global South has induced historic mass migration across national and international borders. The situation is especially dire in Africa, where a sizable number of Africans have chosen or have been forced to leave their countries of origin for Europe and North America. Written by an international team

of scholars this edited book traces the refugee crisis around the world telling the necessary story of forced migration intentional exclusion and human insecurity from an Afrocentric lens The volume is divided into three sections Section I places African migration within the broader contexts of international history law economics and policy Section II discusses cases of African migration to Europe Latin America and the Mediterranean Section III considers negative consequences of mass African migration including the restriction and criminalization of migration post traumatic stress disorder and gender based violence A compelling account of risk resilience and global power dynamics this volume will be useful to students and researchers interested in African studies migration peace and conflict studies and policy as well as professionals practitioners NGOs IGOs governmental and humanitarian organizations

**Global Ideologies Surrounding Children's Rights and Social Justice**

Tshabangu, Icarbord,2017-06-19 Social rights are a pivotal concern for all of society including today s population of children

The study of the rights or lack thereof that children have must be undertaken to ensure that future generations are thriving members of their communities. Global Ideologies Surrounding Children's Rights and Social Justice highlights the trials and tribulations that children have often had to overcome to be considered true citizens of their communities. Featuring comprehensive coverage on a wide range of applicable topics such as child abuse, socio-economic rights, social injustice, and welfare issues, this is a critical reference source for educators, academicians, students, and researchers interested in studying new approaches for the social advancement of children.

**ICT-Supported Innovations in Small Countries and Developing Regions** Ian A. Lubin, 2017-10-11 This timely analysis brings greater clarity to the question of how ICT supported innovations are experienced in small, low to middle income countries and developing regions, with implications for international education and development. By bringing together a group of international technologists, researchers, and scholars, this book explores the building of local capacity for educational technology policy and application in such regions and ably links theory to practice to illuminate how the issues at hand play out in professional practice. The volume offers itself as an invaluable resource by offering a salient assessment of the existent methodological and ecological challenges and constraints in developing, implementing, and evaluating technology and technology research while simultaneously providing recommendations and strategy for future policy and implementation. Among the topics covered: The research agenda for technology education and development; ICT curriculum planning and development; policy and implementation lessons from small developing states; New challenges for ICT in education; policies in developing countries; Playful partnerships for game based learning in international contexts; Addressing persistent ICT in education challenges in small developing countries. **ICT-Supported Innovations in Small Countries and Developing Regions** is of significant interest to educational technology researchers, policymakers, and officials with influence over resource allocation and implementation of technology innovations. It is also relevant to administrators, teachers, instructional designers, and technology evaluators interested in advancing educational communications and technology in public and private settings.
