interest have also been included where appropriate      **Field Gunnery** Donald A. MacAlister,1915      *The Soviet Partisan Movement, 1941-1944* Edgar M. Howell,1956 The purpose of this text is to provide the Army with a factual account of the organization and operations of the Soviet resistance movement behind the German forces on the Eastern Front during World War II This movement offers a particularly valuable case study for it can be viewed both in relation to the German occupation in the Soviet Union and to the offensive and defensive operations of the Wehrmacht and the Red Army The scope of the study includes an over all picture of a quasi military organization in relation to a larger conflict between two regular armies It is not a study in partisan tactics nor is it intended to be German measures taken to combat the partisan movement are sketched in but the story in large part remains that of an organization and how it operated The German planning for the invasion of Russia is treated at some length because many of the circumstances which favored the rise and development of the movement had their bases in errors the Germans made in their initial planning The operations of the Wehrmacht and the Red Army are likewise described in considerable detail as the backdrop against which the operations of the partisan units are projected Because of the lack of reliable Soviet sources the story has been told much as the Germans recorded it German documents written during the course of World War II constitute the principal sources but many survivors who had experience in Russia have made important contributions based upon their personal experience      *Counter-Terrorism for Emergency Responders* Robert A. Burke,2017-10-31 Using the authors many years of experience in emergency services and his skills as a hazardous materials consultant prepares the first responder to handle everything from re establishing control and on scene triage to investigating the crime Including information on pre incident and avoidance tactics the author also discusses monitoring and detection techniques protective equipment and decontamination and an extensive list of resource organizations and training opportunities This up to date 3rd edition is written to provide concise information for emergency responders who might be called upon to confront explosive chemical nuclear biological or incendiary acts of terrorism

*The Soviet Partisan Movement, 1941-1944* Edgar M. Howell,1997      **StarBriefs 2001** ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which

already has too many meanings or confused definitions
