

Environmental Health

- ❖ **Risk Assessment:** Assesses environmental factors that influence human health and quality of life.
- ❖ **Risk Management:** Seeks to prevent adverse effects on human health and ecological systems. Contains environmental toxicology within its scope.

- Risk = the mathematical probability that some harmful outcome will result from a given action, event, or substance
- In the U.S., most risk management is conducted by federal and state agencies like the EPA, FDA and OSHA (Occupational Health and Safety Administration) for workplace hazards

- ❖ **TSCA:** Toxic Substances Control Act (regulates: pesticides, industrial chemicals, and any synthetic chemicals not covered by other agencies)
 - EPA is charged with monitoring 75,000 industrial chemicals.
 - Too many chemicals, too little time, people, resources
 - Only 10% of chemicals on the market are thoroughly tested.
 - Only 2% are screened for carcinogens, mutagens, teratogens.
 - <1% are government regulated.
 - ~0% are tested for endocrine, nervous, or immune effects.
- ❖ **FIFRA:** Federal Insecticide, Fungicide and Rodenticide Act
 - Pesticides to be introduced to market in the U.S. need to be registered with the EPA.
 - Registration involves risk assessment and risk management.
 - EPA assesses research from the manufacturer along with any outside research.
 - EPA can set restrictions on use, or even ban a product.
- ❖ "Innocent until proven guilty":
 - Assume harmless until shown to be harmful
 - Industry can introduce any products it wants.
 - Industry has pressured government to take an "innocent-until-proven-guilty" approach
- ❖ **Precautionary principle:**
 - Assume harmful until shown to be harmless
 - Industry cannot introduce a product until it is very thoroughly tested and shown convincingly to be harmless.
 - Environmental advocates have pressured government to follow the precautionary principle.
- ❖ **Threats include:**
 - Physical hazards (floods, blizzards, landslides, radon, UV exposure)
 - Chemical hazards (disinfectants, pesticides)
 - Biological hazards (viruses, bacterial infections)
 - Cultural or lifestyle hazards (drinking, smoking, bad diet, crime in neighborhood)

APES in a BOX: The Review Sessions Benjamin Wood,Dave Holbert,2013-02-01 APES in a BOX The Review Sessions is a teachers edition of our popular APES Exam study guide APES in a BOX The book is broken into 16 review lessons Each session contains student notes an AP style review quiz and teacher rubrics for quiz grading There is a bonus lesson on tips for the math portion of the exam The most exciting part of this book is that we are selling it as a BLACKLINE MASTER with a single teacher license This means that when you purchase a copy you will be free to make paper copies for all of your students The license only extends to a single teacher and their students Multiple teachers at the same school will need to buy seperate copies for each teacher

Behavioral Toxicology Bernard Weiss,2013-03-09 Behavioral toxicology is a young discipline in the United States so young in fact that this is one of its first books Behavioral questions are bound to play a major role in future scientific work and governmental decisions involving the health effects of environmental contaminants and other chemicals This role springs from two key problems that face scientists and public agencies required to set acceptable exposure standards or to determine criteria for the toxicity of therapeutic chemicals How do you evaluate effects that may show up only as subtle functional disturbances And how do you de tect toxic effects early enough so that they may still be reversible before they produce major damage The contributions in this book come from a collection of scientists whose interests span a wide variety of problem areas The focus is largely on me thodological issues because they represent the most immediate concern of the discipline We expect that this collection of papers will represent a useful source book for behavioral toxicology for some time For the past few years the University of Rochester s Department of Radiation Biology and Biophysics has sponsored a series of international conferences on chemical toxicity partly as a response to concern over the con sequences to health of the rich chemical soup in which we live This book is based upon presentations made to the fifth of the series Held in June 1972 it was the first formal meeting devoted to behavioral toxicology in this country
