Molecular Modelling Peter Bladon, John Gorton, Robert B Hammond, 2019-05-02. This book is a practical, easy-to-use guide for readers with limited experience of molecular modelling. It will provide students at the undergraduate and early postgraduate chemistry level with a similar entry to modelling. The needs of independent readers are catered for by the inclusion of instructions for acquiring and setting up a suitable computer. Unlike many other textbooks in this field, the authors avoid extensive discussion around complex mathematical foundations behind the methods, choosing instead to provide the reader with the choice of methods themselves. To further these aims, the book includes compact discs that provide a comprehensive suite of modelling software and datasets. The continuing interest of the pharmaceutical industry in molecular modelling in early stage drug design is recognized by the inclusion of chapters on Medicinal Chemistry and Drug Discovery. There is a chapter on modelling of the solid state, a subject that is also of importance for pharma, where problems due to polymorphism in the crystalline forms of drugs are often encountered in the later design stages.

Innovative Internet Secrets Doug Knell, 2018-01-11. There are so many secrets packed in here I have to wonder if the Illuminati will have this author assassinated. Derrick Mennings, Marxist Internet Weekly Digest. Written by an engineering expert with comprehensive knowledge of SEO, marketing, computers, and the best Belgian beers to drink with them. Preview the book to enter enlightenment. Give me a couple of hours, and I'll turn you into an internet wizard. There are other internet secrets books, and they work as excellent paperweights and have some therapeutic benefits too; you can use them to put you to sleep. This book is not to be equated with all those boring, as-all-hell books with dubious internet insights and SEO tips. Trust us: what you know about the internet isn't as much as you think you know. Beyond the basics, how clued in are you really about the internet? You probably know more about Bangladesh, which ain't much right than you do about web development, link building, and search engine optimization. The internet may play an integral role in our lives, yet in informal testing, close to 92% of internet users scored no more than basic competence with it. Less than 16% had any legitimate knowledge of SEO/marketing. I can hear you from here: basic competence is good enough for me. Why would I want or need to do more than that? You can use the Google or Bing search engine, but lazily, not with any genuine optimization. Get around the Gmail and Hotmail interfaces, buy an airline ticket at Expedia, order a book at Amazon, and post an update at Facebook. Is that mastery when anyone can do that? Complacency never does anyone any favors. If the complacent had won
