

# Solving for y

(changing a linear equation from standard form to slope-intercept form)

$$y = mx + b$$

$$\begin{array}{r} 2x + 3y = 9 \\ \underline{-2x} \phantom{+ 3y} \\ 3y = 9 - 2x \\ \underline{\div 3} \phantom{+ 3y} \\ y = 3 - \frac{2}{3}x \end{array}$$

$$\begin{array}{r} 8x - 4y = -12 \\ \underline{-8x} \phantom{- 4y} \\ -4y = -8x - 12 \\ \underline{\div -4} \phantom{- 4y} \\ y = 2x + 3 \end{array}$$

Fox,2012-12-06 Nearly 20 years ago we produced a treatise of about the same length as this book entitled Computing methods for scientists and engineers It was stated that most computation is performed by workers whose mathematical training stopped somewhere short of the professional level and that some books are therefore needed which use quite simple mathematics but which

nevertheless communicate the essence of the numerical sense which is exhibited by the real computing experts and which is surely needed at least to some extent by all who use modern computers and modern numerical software In that book we treated at no great length a variety of computational problems in which the material on ordinary differential equations occupied about 50 pages At that time it was quite common to find books on numerical analysis with a little on each topic of that field whereas today we are more likely to see similarly sized books on each major topic for example on numerical linear algebra numerical approximation numerical solution of ordinary differential equations numerical solution of partial differential equations and so on These are needed because our numerical education and software have improved and because our relevant problems exhibit more variety and more difficulty Ordinary differential equations are obvious candidates for such treatment and the current book is written in this sense Numerical Methods Vol-IV ( Tamil Nadu) K

GUNAVATHI,2006-12 This book on Numerical Methods Actually this is in continuation to other three volumes of our book Text book on Engineering Mathematics for B E Course which cater to the needs of the first and the second year students The present book is to meet the requirements of the students of the fifth semester the need of which was being felt very anxiously In the treatment we have tried to maintain the same style as used in the other three volumes All the topics have been covered comprehensively but with clarity in lucid and easy way to grasp There is a good number of fully solved examples with exercises to be worked out at the end of each chapter **Automated Technology for Verification and Analysis** Tevfik
