Weitzman, Matthew B. Miles, 1995-02-02 For those interested in finding a computer application well suited for their own qualitative research or just learning more about the capabilities of the latest generation of computer software designed with text Computer Programs for Qualitative Data Analysis by Eben A Weitzman and Matthew B Miles probably represents the single investment they can make In Computer Programs for Qualitative Data Analysis Weitzman and Miles provide a critical in depth look at 24 separate applications The authors make an impressive team Weitzman is a professor of social and organizational psychology with an extensive computer background and Miles is a social psychologist who is well known in the field of qualitative research for co authoring a popular book on qualitative data analysis with A Michael Huberman Together the two researchers have produced an informative user friendly sourcebook that can save readers a significant amount of time and money when shopping for a software program for qualitative data analysis Weitzman and Miles clearly put a

tremendous amount of work into Computer Programs for Qualitative Data Analysis they write their reviews of each application in remarkably lucid and jargon free language in a format reminiscent of Consumer Reports The level of detail in the reviews reflects their careful and thoughtful field testing of 24 software programs Reviews average about 10 pages each and actually show you what each application can do and every review includes a series of realistic visuals complete with helpful captions that display what the computer screen looks like when performing various functions with that specific computer program In addition to describing the special features of each computer program Weitzman and Miles discuss the strengths and weaknesses of every application and make explicit comparisons with other applications in the same family Sage Publications deserves special credit for their role in publishing Computer Programs for Qualitative Data Analysis Instead of issuing this book in hardcover and attaching a hefty price tag they released it as an oversized 8 1/2 by 11 inch paperback and made this valuable information available at a modest cost Computer Programs for Qualitative Data Analysis is the most comprehensive resource on its subject currently available and is an excellent starting point for qualitative researchers interested in integrating computer technology more fully into their own data analysis strategies Harvard Educational Review The book by Weitzman Miles is one of many new books on computers and qualitative software and indeed a good one The book is truly a user's book one of the useful ones After this first feeling of self confidence I just kept on reading the book and found very thorough and illuminative reviews of no less than 24 computer programs for qualitative analysis Renata Tesch initiated the work of making it easier for us to survey the qualitative analysis methods Weitzman Miles carry on in the finest way Nyhedsbrer Although the authors have a background in social and organizational psychology their expertise on qualitative research methods is relevant to gerontologists The authors give a history of the use of computers in qualitative data analysis describe the different types of programs and suggest future directions but the bulk of this book is reviews of the software out there Before you spend several hundred dollars on a software program spend thirty and get this book T L Brink in Clinical Gerontologist Eben A Weitzman and Matthew B Miles's valuable sourcebook on computer programs is designed exclusively for those interested in qualitative data analysis For qualitative researchers who want to learn or update their knowledge of the use of computer software Choice What program do I use to analyze my field notes Eben A Weitzman and Matthew B Miles provide the information you need to make that decision intelligently full descriptions informed judgments and helpful comparisons Anyone who does fieldwork needs this book Howard Becker Department of Sociology University of Washington Seattle This will be the standard work of reference for several years to come We owe the authors a considerable debt of gratitude for all the work they have put into reviewing such a comprehensive range of software The result is incredibly lucid Paul Atkinson University of Wales Cardiff The book is absolutely perfect for my situation I don't know how many readers will be in the position of purchasing software for respective labs but those who are will be in for a real treat The comprehensiveness of the reviews is more than adequate to determine whether a particular
