The Balanced Scorecard Translating Strategy Into Action:

The Balanced Scorecard Robert S. Kaplan, David P. Norton, 1996 Here is the book by the recognized architects of the Balanced Scorecard that shows how managers can use this revolutionary tool to mobilize their people to fulfill the company's mission. More than just a measurement system, the Balanced Scorecard is a management system that can channel the energies, abilities, and specific knowledge held by people throughout the organization toward achieving long-term strategic goals. Kaplan and Norton demonstrate how senior executives in industries such as banking, oil, insurance, and retailing are using the Balanced Scorecard both to guide current performance and to target future performance. They show how to use measures in four categories: financial performance, customer knowledge, internal business processes, and learning and growth to align individual, organizational, and cross-departmental initiatives and to identify entirely new processes for meeting customer and shareholder objectives. The authors also reveal how to use the Balanced Scorecard as a robust learning system for testing, gaining feedback on, and updating the organization's strategy. Finally, they walk through the steps that managers in any company can use to build their own Balanced Scorecard. The Balanced Scorecard provides the management system for companies to invest in the long term in customers, in employees, in new product development, and in systems rather than managing the bottom line to pump up short-term earnings. It will change the way you measure and manage your business.

The Balanced Scorecard: Translating Strategy into Action,

The Balanced Scorecard Kaplan Robert S., 1996

The Balanced Scorecard Robert S. Kaplan, David Norton, 2009

Kaplan, accounting Harvard and Norton, president of Renaissance Solutions Inc, created the balanced scorecard to assist businesses in moving from ideas to action, achieving long-term goals, and obtaining feedback about strategy. The balanced scorecard consists of four sections: clarifying and translating vision and strategy, communicating and linking strategic objectives and measures, planning, setting targets, and aligning strategic initiatives, and enhancing strategic feedback and learning. Because the writing is technically oriented and somewhat detailed, this work is geared toward scholars and high-level business planners. However, its clear organization makes reading and understanding the concepts much easier.

Recommended for upper-level and graduate business students and senior practitioners in the strategic planning field. The

Balanced Scorecard, 2010

The HR Scorecard Brian E. Becker, Mark A. Huselid, David Ulrich, 2001 Introduces a new way of measuring and thinking about the contributions of individuals to business success. Makes the case that the role of Human Resources is increasingly important as company assets become more intangible and reliant on intellectual capital. Provides a framework that focuses on identifying where Human Resources issues are performance drivers or impediments to strategy implementation. Develops a measurement system that provides valid, reliable indicators of Human Resources contribution to the success of strategy implementation and ultimately to firm performance. Includes recommendations supported by clear and persuasive examples as well as the authors' unique survey of 2,800 firms.

Translating Strategy into Shareholder Value

Raymond J. Trotta, 2003-09-19 Too often there are serious missed signals between a company's stated goals and the methods employed to try to reach them Translating Strategy into Shareholder Value is a unique look at how the planning process relates to the achievement of shareholder value and ways to ensure that the two directly complement each other Using tools and a special case study to analyze past present and future performance the book takes readers through a host of steps including Comparing existing strategy to the competition and the economy as a whole Analyzing productive capabilities and costs Bringing nonfinancial metrics to test how future strategy creates value Selecting the right analytical tool and looking at strategic solutions If corporations are to truly maximize their success managers need to understand how to translate corporate strategy to the bottom line and that means seeing the big picture [How to Innovate in Marketing \(Collection\)](#)
