Atomic Cannon David Doyle, 2019-09-30 A pictorial history of this powerful piece of artillery an icon of the Cold War era In
 1949 the US Army wanted an artillery gun that could fire a nuclear warhead in the event that guided missiles and long range
 bombers proved insufficient in delivering atomic weapons The result was the M65 280mm Atomic Cannon On May 25 1953 at
 0830 hours an M65 of A Battery 867th Field Artillery Battalion let loose with the only nuclear round the type would ever fire
 Six battalions of the M65 would eventually be deployed most in Europe with one battalion sent to the Korean Peninsula
 Though never used in combat they served as a significant tactical nuclear deterrent Through historic photos this volume
 traces the development production and deployment of this iconic piece of military equipment from the drawing boards to the
