

ADVANCED COMMUNICATION SERIES

COMMUNICATING ON TELEVISION

Assignment #1: STRAIGHT TALK

Objectives

- To effectively present an opinion or viewpoint in a short time.
- To simulate giving a presentation as part of a television broadcast.
- TIME: 3 minutes, plus or minus 30 seconds.

Note to the Evaluator:

For this project, the speaker was asked to prepare and present an editorial designed for an "on camera" television presentation. The editorial should clearly present the news event or current issue that it addresses, and present a reaction or stand to the event or issue. Although the presentation may be videotaped, your evaluation will be based on the live presentation. However, it is suggested you review the videotape later with the speaker and discuss how effective the presentation would have been had it actually been broadcast. It is suggested you read the entire project and the appendix before you hear the presentation.

Evaluation Guide

1. What was the news event or current issue on which the editorial was based?
2. What reaction did the speaker have toward the news event or issue? Was it clearly presented?
3. Did the speaker show sound logic and reasoning in explaining his / her viewpoint?
4. Were the words carefully chosen, short and clearly pronounced?
5. Did the speaker relate convincingly to the television camera?
6. Was the speaker's appearance appropriate? How did his or her appearance affect the editorial?
7. How effective do you feel the editorial would have been had it actually been broadcast?

web [1 positions of auxiliary symbols for surface symbol a surface roughness value cut off value or reference length machining
method grain direction surface undulation etc are indicated around the surface symbol as shown in fig 1 below fig 1 positions](#)

of auxiliary symbols a ra value b machining method c cut off value evaluation length

surface roughness chart understanding surface finishes - Jan 28 2022

web nov 11 2021 the ra surface finish chart shows the arithmetic average of surface heights measured across a surface as already mentioned there are three basic components of a surface roughness waviness and lay therefore different factors are affecting the characteristics of surface geometry

surface finish symbols charts measurements best practices - Mar 30 2022

web iso and ansi standards provide guidelines and symbols for surface finish specifications ensuring clear communication between designers and manufacturers a detailed explanation of surface finish units from ra to rz ra average roughness

surface finish surface roughness it s indications symbols - Jul 14 2023

web may 12 2020 it is suggested to indicate the surface roughness on drawing by symbols the bis recommended symbols for indicating the surface finish are shown in table a for the roughness values greater than 25µm the symbol is used for roughness value less than 25µm the equilateral triangular symbol is used

surface finish chart symbols roughness conversion tables - Jun 13 2023

web surface finish symbols callouts and standards in the united states surface finish is usually specified using the asme y14 36m standard the rest of the world commonly uses international organization for standardization iso 1302
