the pragmatic and the socio cultural dimensions This gives turn to state that the students written performance is better at the recognition level than the production due to the negative interference of their mother tongue The book concludes that Kurd EFL learners at the university level face serious difficulties when writing in English The inappropriateness of their written performance can be attributed to the negative effects of their first language lack of contact with English native speakers and culture as well as the limited opportunities to have been in English speaking communities Therefore for enhancing EFL university students written performance it is recommended that they should be introduced to the English culture through adding pragmatics and English Culture as two separate subject matters to the curricula and to arrange summer courses for the students in English speaking countries UK and US in particular
