A Practical Introduction to Day Trading Don Charles,2018-11-14 Many individuals enter financial markets with the objective of earning a profit from capitalizing on price fluctuations However many of these new traders lose their money in attempting to do so The reason for this is often because these new traders lack any fundamental understanding of financial markets they cannot interpret any data and they have no strategy for trading Trading in markets is really about deploying strategies and managing risks Indeed successful traders are those who have strategies which they have proved to be consistent in granting them more financial gains than financial losses The purpose of this book is to help a potentially uninformed retail trader or inquisitive reader understand more about financial markets and assist them in gaining the technical skills required to profit from trading It represents a beginner's guide to trading with a core focus on stocks and currencies

Technical Analysis And Financial Asset Forecasting: From Simple Tools To Advanced Techniques Raymond Hon-fu Chan,Alan Wing-keung Wong,Spike Tsz-ho Lee,2014-08-19 Technical analysis is defined as the tracking and prediction of asset price movements using charts and graphs in combination with various mathematical and statistical methods More precisely it is the quantitative criteria used in predicting the relative strength of buying and selling forces within a market to determine what to buy what to sell and when to execute trades This book introduces simple technical analysis tools like moving averages and

Bollinger bands and also advanced techniques such as wavelets and empirical mode decomposition. It first discusses some traditional tools in technical analysis such as trend line, trend channel, Gann's Theory, moving averages, and Bollinger bands. It then introduces a recent indicator developed for stock market and two recent techniques used in the technical analysis field: wavelets and the empirical mode decomposition in financial time series. The book also discusses the theory to test the performance of the indicators and introduces the MATLAB Financial Toolbox, some of the functions/codes of which are used in our numerical experiments.
