HUMAN DYNAMICS FOR THE 21ST CENTURY

BY SANDRA SEAGAL AND DAVID HORNE

As a global society increasingly becomes a reality and people strive to come together across divisions of culture, religion, race, age, gender,

involved more than 80,000 people from over 25 cultures. From this research, we discovered that three universal principles—mental, emotional,

nificant for developing successful and effective human relationships of all kinds—for leading and partnering with others in the workplace, for developing

Understanding Human Dynamics from Large-scale Location-centric Social Media Data Dingqi Yang, 2015 Human dynamics is an essential aspect of human centric computing As a transdisciplinary research field it focuses on understanding the underlying patterns relationships and changes of human behavior By exploring human dynamics we can understand not only individual s behavior such as a presence at a specific place but also collective behaviors such as social movement Understanding human dynamics can thus enable various applications such as personalized location based services However before the availability of ubiquitous smart devices e g smartphones it is practically hard to collect large scale human behavior data With the ubiquity of GPS equipped smart phones location based social media has gained increasing popularity in recent years making large scale user activity data become attainable Via location based social media users can share their activities as real time presences at Points of Interests POIs such as a restaurant or a bar within their social circles Such data brings an unprecedented opportunity to study human dynamics In this dissertation based on large scale location centric social media data we study human dynamics from both individual and collective perspectives From individual perspective we study user preference on POIs with different granularities and its applications in personalized location based services as well as the spatial temporal regularity of user activities From collective perspective we explore the global scale collective activity patterns with both country and city granularities and also identify their correlations with diverse human cultures
