Song, 2018-01-05 Student Resources click here for access Instructor Resources PowerPoint slides spreadsheets and case discussion questions and solutions Sound financial analysis and decision making require a thorough comprehension of theory plus the insight and judgment that come from experience Gapenski's Cases in Healthcare Finance gives students an opportunity to bridge the gap between learning theoretical concepts in the

classroom and applying those concepts in the real world. By working the cases in this book, students who have a basic understanding of healthcare finance can better prepare for the multitude of problems they will face in practice. The book's 32 case studies feature a variety of healthcare settings from hospitals and clinics to medical practices, home health organizations, integrated delivery systems, and more. Each case focuses on a single issue related to a specific area of financial management, including Cost behavior and profit analysis, Cost allocation, Pricing planning and budgeting, Capital acquisition and allocation, Financial condition analysis and forecasting, Current asset management, Business valuation. The cases are supported by an extensive array of ancillary resources including spreadsheet models for both instructors and students, case questions and solutions, and PowerPoint slides, all substantially updated and reorganized for this edition. Since 2000, this highly regarded book has been used in healthcare finance courses throughout the United States. Original author Louis C. Gapenski was recognized both nationally and internationally as an expert in healthcare finance. In the sixth edition, authors George H. Pink and Paula H. Song carry forward Dr. Gapenski's legacy to the field of healthcare administration. As the provision of healthcare continues to evolve and advance, this book will help students develop the insight and judgment they need as future leaders.

Healthcare Financial Management Cassandra R. Henson, 2023-06-29 Healthcare Financial Management: Applied Concepts and Practical Analyses is a comprehensive and engaging resource for students in health administration, health management, and related programs. It brings together the problem-solving, critical thinking, and decision-making skills that students need to thrive in a variety of health administration and management roles. Engaging case studies, practice problems, and data sets all focus on building the core skills and competencies critical to the success of any new health administrator. Real-world examples are explored through a healthcare finance lens, spanning a wide variety of health care organizations, including hospitals, physician practices, long-term care, and more. Core conceptual knowledge is covered in detailed chapters, including accounting principles, revenue cycle management, and budgeting and operations management. This conceptual knowledge is then brought to life with an interactive course project which allows students to take ownership of and apply their newly acquired skills in the context of a nuanced real-world scenario. Healthcare Financial Management is an engaging and thorough resource that will equip students with both the theoretical and practical skills they need to make a difference in this dynamic and rapidly growing field.

Key Features: Student-focused textbook that builds critical thinking, problem-solving, and decision-making skills around financial strategy, financial management, accounting, revenue cycle management, budgeting, and operations and resource management. 20 years of the author's professional industry experience is applied to the textbook, preparing students for the complexities of real-world scenarios. Microsoft Excel exercises accompany the standard healthcare finance calculations for hands-on practice and application of concepts. Chapter case studies based on timely subject matter are presented at the end of every chapter to reinforce key concepts. An interactive course project demonstrates the entire healthcare finance role by bringing together the healthcare finance concepts and calculations in an
