

CO-SLEEPING with your baby

The safest place for a baby to sleep is in their own clear, flat, separate sleep space, such as a cot or Moses basket. However, we know that many parents find themselves co-sleeping whether they mean to or not. Wherever you're planning for your baby to sleep, we recommend making your bed a safer place for baby.

1

Keep pillows, sheets, blankets away from your baby or any other items that could cover their head or cause them to get too hot

2

Follow all The Lullaby Trust's other safer sleep advice to reduce the risk of SIDS such as sleeping baby on their back

3

To reduce the risk of accidents, do not bring other children or pets into bed with you

4

Check that baby cannot be trapped, wedged or fall out of bed or get trapped between the mattress and the wall

5

Never leave your baby unattended in an adult bed

It is important to know that co-sleeping with your baby is very dangerous if:

- ✗ Your baby was born prematurely (before 37 weeks of pregnancy) or weighed under 2.5kg or 5½ lbs when they were born
- ✗ You or anyone in the bed smokes
- ✗ You or anyone in the bed has recently drunk any alcohol
- ✗ You or anyone in the bed has taken any drugs or medication that makes you less aware than usual

The Nurture Revolution Greer Kirshenbaum, PhD, 2023-06-20

The latest research in neuroscience and parenting come together in this groundbreaking book which brings to light new realizations about the power of nurture for our children's mental and physical health outcomes Greer Kirshenbaum PhD is a neuroscientist doula and parent Her work began with the goal of developing new treatments for poor mental health she dreamed of creating a new medication to address conditions like anxiety depression addiction and chronic stress Over time she realized that science had already uncovered a powerful medicine for alleviating mental health struggles but the answer wasn't a pill It was a preventative approach when babies receive nurturing care in the first three years of life it builds strong resilient brains brains that are less susceptible to poor mental health How can parents best set their children up for success In this revelatory book Dr Kirshenbaum makes plain that nurture is a preventative medicine against mental health issues She

challenges the idea that the way to cultivate independence is through letting babies cry it out or sleep alone instead the way to raise a confident securely attached child is to lean in to nurture to hold your infant as much as you want support their emotions engage in back and forth conversations be present and compassionate when your baby is stressed and share sleep Research has proven that nurturing experiences transform lives Nurturing is a gift of resilience and health parents can give the next generation simply by following their instincts to care for their young

SIDS Sudden infant and early childhood death Jhodie R. Duncan, Roger W.
