INTRODUCTION

Dear Whistler Owner,

With the change in time also comes change in technology. Radar gun manufacturers have stepped up to the plate. The new animal they call is called POP™ Mode. This new gun is a normal K or Ka-band radar gun detectable by most radar detectors made in the past 30 years, unless the gun is placed in POP™ Mode. POP™ Mode is a feature on some newer radar guns operating on K and Ka-bands. When the gun is in POP™ Mode and activated, stored burst of energy, less than 1/10 of a second, is transmitted and the vehicle's speed is quickly acquired. A detector without POP™ Mode detection capability cannot respond to the burst transmission. This detector has the power to report this new gun when other detectors cannot - and now!

Whistler introduces the Pro-58 and Pro-73 with POP™ Mode detection! These units are the beginning in total protection. With POP™ Mode detection, these units can react fast enough to detect the new technology. Packed with power you still have a full featured radar detector.

- **INTENSE BLUE TEXT DISPLAY (PRO-73 Only)** provides distinct visual confirmation of signals detected, signal strength, and indicates engaged modes of operation.
- **HIGH GAIN OPTICAL LENS** which provides increased laser sensitivity.
- **REAL VOICE™ ALERTS (PRO-73 Only)** are given initially through the detector so you do not have to take your eyes off the road to look at the display.
- **SEVEN SEGMENT DISPLAY (PRO-58 Only)** provides intense blue numeric signal strength indicator and band identification.

Even though these units are packed full of features, they're still easy to use. To fully utilize your unit to its potential, we recommend reading this entire manual or visit our R&D page on our web site www.whistlergroup.com.

Enjoy your new Whistler and please drive safely.

Sincerely,

The Whistler Group, Inc.
