Doing so can result in death, explosion, or fire.

ADDING LAUNDRY PRODUCTS

IMPORTANT: Do not overfill. Do not overfill detergent or liquid fabric softener. It may also result in component malfunction and, over time, buildup of suds in the tub. Always follow the manufacturer's instructions for the best performance.

ADDING HE DETERGENT TO BASKET

Add a measured amount of detergent or single-dose laundry pods into the basket. If using one type of detergent, color-safe bleach, or fabric softener, measure it into the basket of the washer basket before adding clothes.

NOTE:

Follow the manufacturer's instructions to determine the amount of laundry products to use.

ADDING LIQUID CHLORINE BLEACH

Do not overfill. Add, or use more than 1 cup (236 mL) Do not use color-safe bleach or gel product in this cycle with liquid chlorine bleach.

ADDING LIQUID FABRIC SOFTENER

Do not overfill. Follow the instructions with the washer. Whirlpool suggests using the Dosing Ball® dispenser. Pour a measured amount of liquid fabric softener into the Dosing Ball® dispenser, put the cap tightly to seal it, and place on top of the basket. Follow manufacturer's directions for correct amount of fabric softener based on your load size. Then use the Rinse/Options button to select Fabric Softener. The Dosing Ball® dispenser will automatically release the fabric softener at the correct time in the cycle. For more information, see using the Dosing Ball® dispenser visit www.dosingball.com.

ADDING LIQUID FABRIC SOFTENER MANUALLY

During the final rinse, wait until the washer has completed spinning a cycle. Press the Start/Pause button to pause the washer. Add the softener to the tub. Add the correct amount of liquid fabric softener. Close the lid and hold the Start/Pause button to resume the cycle.

CHOOSING THE RIGHT CYCLE

A cycle guide for your washer can be found online at www.whirlpool.com. This document will help identify which cycle to choose for various load types as well as the default cycle options. For example we recommend using the NORMAL cycle with Warm water for cottons, linens, and mixed-garment loads.

MORE WATER WHEN YOU WANT IT

AUTO SENSING AND DEEP WATER

- The washer will adjust the water level to the optimal amount for a High-Efficiency wash of the detected load size.
- Press Deep Water to automatically add more water to your wash cycle.
- It is recommended to use BULKY ITEMS cycle with Deep Water option for loads where maximum water level is desired.
- Expect longer cycle times due to extended fill duration when using the Deep Water option.

PRE-TREATING BEFORE A WASH CYCLE

- Press the Pre-treat button once to turn on and press again to turn off.
- Pre-treat will automatically shut off after 30 seconds or when max water level is reached.
- Water will automatically drain if water level becomes too high. Water will also drain after 10 minutes if the lid is left closed or 3 hours if the lid is left closed.

CLEANING WITH LESS WATER

The washer has been designed and optimized to provide a thorough cleaning using less water to conserve energy and resources. As the water drains and moves the load, the level of the items will settle in the basket. This is normal, and does not indicate that more items should be added. **IMPORTANT:** You will not see a full basket of water as with older, less efficient washing machines. It is normal for some of the load to be above the water line.

For detailed installation instruction and maintenance information, writer storage, and transportation tips, please see the Owner's Manual included with your machine.
