the process of individuation a key notion in analytical psychology which lies at the heart of the Jungian enterprise and is a topic that has occupied Stein throughout his career Finally Part Four presents several papers dealing with the theme of psychology and spirituality a matter of increasing concern to Stein in recent years This unique collection of work will be of great interest to analytical psychologists and psychotherapists as well as academics and students in the field Additionally for anyone invested in the project of self discovery and with the desire to relate more deeply to self and world the papers included here will suggest important points of reference and directions to pursue further
