more flexible yet effective learning opportunities This book recognizes the associated opportunities and challenges for
teachers and provides the rationale strategies and tools to design blended learning courses or to guide the transition from
fully face to face or fully online courses to blended instruction The authors propose a framework based on four phases Design
Build Teach and Evaluate which facilitates a systematic approach to course development The volume simplifies the
connection between theory and practice by including examples that readers can relate to and immediately implement as they
build or teach a course Including case studies of successful implementations and effective instructional strategies and

The comparative investigation of the acquisition of gender in Spanish by early and late bilinguals of different language
combinations is highly debated and crucial as the phenomenon of gender involves grammatical features that differ in all
three languages under investigation Against this background both early and late bilinguals face an arduous learning task
which differs in complexity Couched within a generative framework the empirical study focuses on 257 participants with
different levels of proficiency in Spanish ranging from low to advanced and through a series of tests aims to discover which
extra linguistic and intra linguistic factors act as triggers for non native outcomes in adult heritage speakers and L2 learners
The observed morphological variability is argued not to stem from a representational i e syntactic deficit but rather from a
mapping problem in L2 learners and heritage speakers Successful attainment in terms of gender is possible but dependent
on the interplay between various extralinguistic and linguistic factors Bulletin University of Minnesota,1924 **Annual**
