What affect did the Islamic invasion have on the history of Spain?

THE IMPACT OF THE ISLAMIC INVASION ON SPAIN The history of Spain reflects the effect of certain cultures and religions on Spanish population, language, traditions and style of life. In the Middle Ages (about 411 AD) Spain was occupied by the German tribes and further the country was conquered by the Visigoths (416 AD) (Collins, 1995). However, the aim of this essay is to analyse the impact of the Islamic invasion on Spain, as the Muslims has had a considerable effect on the country up to the present day. In 711-714 the Umayyad dynasty seized the Spanish area near Cordoba (Rahman, 1989); forty years later Abd al-Rahman I created an Umayyad Emirate. But it was in the tenth century under the ruling of Abd al-Rahman III (912-961) that the Muslims managed to intensify Spain's prosperity and wealth (Goodwin, 1990). Abdal-Rahman III united some areas of al-Andalus and improved military, tax and law systems. In the eleventh century the Emirate was divided into several kingdoms with unique cultures and traditions. After the decay of the Umayyad dynasty, other Islamic dynasties took control over Spain, such as the Almoravides, the Almohades and the Nasrids (Taha, 1989). At the end of the fifteenth century the Christian rulers seized the power in Granada and put an end to the Muslim ruling. Other Spanish places, such as Seville and Cordoba, were liberated from the Muslims by Ferdinand of Aragon and Isabella of Castile in the thirteenth century. But the Islamic influence has preserved in Spain till nowadays, though Isabella made everything to destroy Islam and eradicate any traces of the Muslims. The Islamic invasion positively affected many areas of life in Spain, such as culture, education, religion, economics, science, society and family. Al-Andalus, as the Muslims called Spain, had acquired the central position among other civilizations of the ancient world since the conquest of Cordoba by the Umayyad dynasty (Chejne, 1974). In particular, the Muslims created about two thousand public baths and mosques for different social groups and implemented some schools for poor children in Cordoba. Although some Spanish regions opposed the Muslim ruling, industry and trade were considerably advanced by the Umayyads (Harvey, 1990). Spanish libraries contained more than 400,000 books and the streets of Cordoba were illuminated, unlike such European capitals as Paris and London. As Hillenbrand (1999) puts it, Cordobain its prime had no peer in Europe for the amenities of civilized life. Its houses were bountifully supplied with hot and cold running water, its streets were lit at night (p.175). Different religious groups, such as Christians, Muslims and Jews, successfully interacted with each other. According to Ghazanfar (2004), there existed no separation between science, wisdom, and faith; nor was East separated from the West, nor the Muslim from

Latino Language and Literacy in Ethnolinguistic Chicago Marcia Farr, 2005-01-03. This volume, along with its companion *Ethnolinguistic Chicago: Language and Literacy in the City's Neighborhoods*, fills an important gap in research on Chicago and more generally on language use in globalized metropolitan areas. Often cited as a quintessential American city, Chicago is and always has been a city of immigrants. It is one of the most linguistically diverse cities in the United States and home to one of the largest and most diverse Latino communities. Although language is unquestionably central to social identity and Chicago has been well studied by scholars interested in ethnicity, until now no one has focused as do the contributors to these volumes on the related issues of language and ethnicity. *Latino Language and Literacy in Ethnolinguistic Chicago* includes ethnographic studies based in home settings that focus on ways of speaking and literacy practices; studies that explore oral language use and literacy practices in school contexts; and studies based in community spaces in various neighborhoods. It offers a rich set of portraits emphasizing language use as centrally related to ethnic class or gender identities. As such, it is relevant for anthropologists, sociologists, linguists, historians, educators, and educational researchers and others whose concerns require an understanding of ground-level phenomena relevant to contemporary social issues and as a text for courses in these areas.

Computational Linguistics and Intelligent Text Processing Alexander Gelbukh, 2011-02-07. This two-volume set, consisting of LNCS 6608 and LNCS 6609, constitutes the thoroughly refereed proceedings of the 12th International Conference on Computer Linguistics and Intelligent Processing held in Tokyo, Japan, in February 2011. The 74 full papers presented together with 4 invited papers were carefully reviewed and selected from 298 submissions. The contents have been ordered according to the following topical sections: lexical resources; syntax and parsing; part of speech tagging and morphology; word sense disambiguation; semantics and discourse; opinion mining and sentiment detection; text generation; machine translation and multilingualism; information extraction and information retrieval; text categorization and classification; summarization and recognizing textual entailment; authoring aid; error correction and style analysis; and speech recognition and generation.
