With inadequate time and resources to train their troops for the industrial battlefield citizen armies typically relied on appeals to masculinity nationalism and ethnicity to unite their troops and to encourage them to fight By contrast cohesion among today s professional soldiers is generated and sustained quite differently While concepts of masculinity and patriotism are not wholly irrelevant the combat performance of professional soldiers is based primarily on drills which are inculcated through intense training regimes Consequently the infantry platoon has become a highly skilled team capable of collective virtuosity in combat The increasing importance of training competence and drills to the professional infantry soldier has not only changed the character of cohesion in the twenty first century platoon but it has also allowed for a wider social membership of this group Soldiers are no longer included or excluded into the platoon on the basis of their skin colour ethnicity social background sexuality or even sex women are increasingly being included in the infantry but their professional competence alone can they do the job In this way the book traces a profound transformation in the western way of warfare to shed light on wider processes of transformation in civilian society This book is a project of the Oxford Programme on the Changing Character of War *National Library of Medicine Audiovisuals Catalog* National Library of Medicine (U.S.),
