Intra-Africa Migrations Innocent Moyo, Jussi P. Laine, Christopher Changwe Nshimbi, 2021-02-21 This book discusses regional and continental integration in Africa by examining the management of migration across the continent It examines borders and securitisation of migration and the challenges and opportunities that arise out of reconfigured continental demographics The book offers insights on intra Africa migrations and highlights how intra continental migration creates socio economic and cultural borders It explores how these borders beyond the physical boundaries of states including the Berlin Conference constructed borders create cultural divides challenges for economic integration and cross border security and irregular migration patterns While the movement of economic goods is valued for regional economic integration the mobility of people is seen as a threat This approach to migration contradicts the intentions of true integration and development and triggers negative responses such as xenophobia that cannot be addressed by simply managing the physical border and allowing free movement This book engages in a pivotal discussion of these issues which are hitherto missing in African border studies by demonstrating the ubiquity and overreaching influence of various kinds of borders on the African continent With multidisciplinary contributions that provide an in depth understanding of intra Africa migrations and

strategies for enhanced migration management this book will be a useful resource for scholars and students studying geography politics security studies development studies African studies and sociology ["ECEG2016-Proceedings of 16th European Conference on e-Government ECEG 2016"](#) Mitja De Man,Tina Juki,2016-06-02 **A Global History of**

Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world. The Ethics of Military Privatization

David M. Barnes, 2016-08-25 This book explores the ethical implications of using armed contractors taking a consequentialist approach to this multidisciplinary debate. While privatization is not a new concept for the US military, the public debate on military privatization is limited to legal, financial and pragmatic concerns. A critical assessment of the ethical dimensions of military privatization in general is missing. More specifically, in light of the increased reliance upon armed contractors, it must be asked whether it is morally permissible for governments to employ them at all. To this end, this book explores four areas that highlight the ethical implications of using armed contractors: how armed contractors are distinct from soldiers and mercenaries, the commodification of force, the belligerent equality of combatants and the impact of armed contractors on the professional military. While some take an absolutist position wanting to bar the use of private military altogether, this book reveals how these absolutist arguments are problematic and highlights that there are circumstances where turning to private force may be the only option. Recognising that outsourcing force will continue, this book thus proposes some changes to account for the problems of commodification, belligerent equality and the challenge to the military profession. This book will be of interest to students of private security, military studies, ethics, security studies and IR in general. *South Africa's Defence Industry*

Greg Mills, Martin Edmonds, 2001 *Land Rights, Biodiversity Conservation and Justice*

Sharlene Mollett, Thembela Kepe, 2018-04-17 In the context of sustainable development, recent land debates tend to construct two porous camps. On the one side, norms of land justice and their advocates dictate that people's rights to tenure security are tantamount and even sometimes key to successful conservation practice. On the other hand, biodiversity protection and conservation advocates supported by global environmental organizations and states remain committed to conservation strategies steeped in genetics and biological sciences working on behalf of a global mandate for biodiversity.

and climate change mitigation Land Rights Biodiversity Conservation and Justice seeks to illuminate struggles for land and territory in the context of biodiversity conservation This edited volume explores the particular ideologies narratives and practices that are mobilized when the agendas of biodiversity conservation practice meet clash and blend with the demands for land and access and control of resources from people living in and in close proximity to parks The book maintains that while biodiversity conservation is an important goal in a time where climate change is a real threat to human existence the successful and just future of biodiversity conservation is contingent upon land tenure security for local people The original research gathered together in this volume will be of considerable interest to researchers of development studies political ecology land rights and conservation
