The Body Electric Carolyn Thomas de la Pena,2005-04 Between the years 1850 and 1950 Americans became the leading energy consumers on the planet expending tremendous physical resources on energy exploration mental resources on energy exploitation and monetary resources on energy acquisition A unique combination of pseudoscientific theories of health and the public s rudimentary understanding of energy created an age in which sources of industrial power seemed capable of curing the physical limitations and ill health that plagued Victorian bodies Licensed and quack physicians alike promoted machines electricity and radium as invigorating cures veritable fountains of youth that would infuse the body with energy and push out disease and death The Body Electric is the first book to place changing ideas about fitness and gender in dialogue with the popular culture of technology Whether through wearing electric belts drinking radium water or lifting mechanized weights many Americans came to believe that by embracing the nation s rapid march to industrialization electrification and radiomania their bodies would emerge fully powered Only by uncovering this belief s passions and products Thomas de la Pe a argues can we fully understand our culture s twentieth century energy enthusiasm

Healing Waters Loring Bullard,2004 Missouri s mineral springs and resorts played a vital role in the social and economic development of the state In *Healing Waters* Loring Bullard delves into the long history of these springs and spas concentrating particularly on the use and development of the mineral springs from 1800 to about the 1930s During this period there were at least eighty sites in the state that could be described as resorts Because so many people were drawn to the springs by their faith in the healing virtues of the springwater towns were frequently founded at the mineral springs These places fought hard to capture the attention of Missourians who were seeking better health relaxation or good times in the late 1800s and early 1900s Bullard first examines the development of mineral water resorts in Europe from ancient times early spa traditions in America and Missouri s frontier spas He then discusses the establishment of saltworks at the state s saline springs and the importance of the early salt trade the brisk business that grew around the bottling of mineral waters the use and development of mineralized groundwater resources the geologic and biologic factors that create Missouri s mineral waters and public and professional belief in the curative values of mineral waters *Healing Waters* also traces the demise of Missouri s mineral water resorts and towns Well into the twentieth century when modern medicine had seemingly taken hold many physicians and scientists continued to proclaim the medicinal virtues of mineral waters However by the second quarter of the twentieth century medical science and popular opinion had discounted the immediate medical usefulness of mineral waters As advances were made in microbiology and biochemistry and with the inherent promise of drug cures orthodox medicine began to turn a cold shoulder on mineral water treatments Spa treatments with their long regimens also did not fit well with the increasingly fast paced lifestyles of the public By visiting the sites gathering local historical accounts interviewing local citizens and photographing remaining artifacts Bullard has done a masterful job in providing the answers to why these vibrant social centers came to be and why they faded
