Parallel Problem Solving from Nature, PPSN XI Robert Schaefer, Carlos Cotta, Joanna Kolodziej, Günter Rudolph, 2010-09-13 We are very pleased to present to you this LNCS volume the proceedings of the 11th International Conference on Parallel Problem Solving from Nature PPSN 2010 PPSN is one of the most respected and highly regarded conference series in evolutionary computation and indeed in natural computation as well. This biennial event was first held in Dortmund in 1990 and then in Brussels 1992 Jerusalem 1994 Berlin 1996 Amsterdam 1998 Paris 2000 Granada 2002 Birmingham 2004 Reykjavik 2006 and again in Dortmund in 2008 PPSN 2010 received 232 submissions. After an extensive peer review process involving more than 180 reviewers the program committee chairs went through all the review reports and ranked the papers according to the reviewers' comments. Each paper was evaluated by at least three reviewers. Additional reviewers from the appropriate branches of science were invoked to review interdisciplinary papers. The top 128 papers were finally selected for inclusion in the proceedings and presentation at the conference. This represents an acceptance rate of 55% which guarantees that PPSN will continue to be one of the conferences of choice for bio-inspired computing and metaheuristic researchers all over the world who value the quality over the size of a conference. The papers included in the proceedings volumes cover a wide range of topics from evolutionary computation to swarm intelligence from bio-inspired computing to real world applications. Machine learning and mathematical games supported by evolutionary algorithms as well as memetic agent-oriented systems are also represented. They all are the latest and best in natural computation. The proceedings are composed of two volumes divided into nine thematic sections. Modeling for Decision Support in Network-Based Services Daniel Dolk, Janusz Granat, 2012-01-11 This book originated from several recent workshops and related activities conducted by the IFIP Working Group 7.6 on Optimization Based Computer Aided Modeling and Design. This group has been active for 20 years with the stated objective of developing high performance computer aided systems to support modeling, decision analysis, optimization and multi criteria decision making. Recently the group has turned its attention to the application of modeling and optimization to service science management and engineering. SSME is still a young research field searching for its theoretical underpinnings and one which offers many opportunities for analytical modeling to not only advance the understanding but also to help form the foundation of a new discipline. This book is the result of the group's introductory foray into the application of quantitative modeling to the nascent field of service science with special emphasis on the network aspects of services. The 11 papers presented are grouped into sections on Network Science, Computational and Analytical Modeling and Knowledge Science. They showcase the value of modeling in a new and timely context and provide many seeds for further exciting research. **InfoWorld**, 2002-11-25 InfoWorld is targeted to Senior IT professionals.
