**Chaos, Information, And The Future Of Physics: The Seaman-rossler Dialogue With Information Perspectives By Burgin And Seaman** William Seaman, Otto E. Rossler, Mark Burgin, 2023-06-22. The main part of the book consists of the dialogue between physicist Otto Rossler and artist and AI researcher Bill Seaman, with the commentaries disclosing information perspective by information scientist Mark Burgin and Bill Seaman. In this dialogue, Rossler and Seaman discuss concepts surrounding Rossler's major research over his lifetime. Additionally, each research topic is linked to the set of papers and books published by Rossler and other related collaborative researchers. The goal is to delineate an intellectual directory for future researchers. The discussed topics being transdisciplinary in nature, cross many fields in science and technology. A comprehensive historical bibliography is also included. The work explores many fields germane to theoretical science as Rossler was often quite early in developing these fields and interacting with many famous scientists. This work pertains to information theory, which has often been left out of the historical literature. Burgin, as an expert in information theory, is providing an information perspective on this dialogue, adding historical discussion and relevant scientific and mathematical underpinnings of the discussed ideas. His observations are complemented by Seaman, who presents the synthesis of artistic and scientific outlook. Addendum contains articles describing Rossler's relationships to colleagues from multiple fields, a parable by Rossler, and papers related to Rossler's research and theoretical models of processes in the universe.
