To the right of the band, a polar bear is pushing a shopping cart filled with various items, including a small child, across a patch of ice. In the upper right, several small, white, cloud-like creatures with faces are floating. The background features a bright yellow sun, blue sky, and a blue body of water. In the foreground, a train is shown moving from left to right, carrying a yellow car, a tree, and various boxes and debris. A person is seen climbing a tree on one of the train cars. The overall scene is a satirical take on climate change and consumerism.

**Economics and Management of Climate Change** Bernd Hansjürgens,Ralf Antes,2008-07-01 Climate change is one of the biggest challenges for mankind Although there is increasing evidence that climate change is already occurring there is neither sufficient knowledge as to what extent climate change poses risks to societies and companies nor about adequate strategies to cope with these risks Bringing together an international group of scholars from environmental economics political science and business this book describes analyses and evaluates climate change risks and responses of societies and companies The book contributes to the question of how climate change can be mitigated by discussing efficient and effective design of mitigation measures in particular emissions trading and clean development mechanism CDM Placing special emphasis on the impact of climate change risks on business the book investigates in which way selected sectors of the economy are affected and what measures they can undertake to adapt to climate change risks

**Learner-Centered Teaching Activities for Environmental and Sustainability Studies** Loren B. Byrne,2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information develop skills via hands on engagement and encourage personal reflection through metacognitive tasks In addition learner centered classroom approaches may challenge students preconceived notions and expand their thinking by confronting them with thought provoking statements tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work group discussions service and project based learning and student led research among others Unfortunately it is often not possible to use some of these valuable methods in all course situations given constraints of money space instructor expertise class meeting and instructor preparation time and the availability of prepared lesson plans and material Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses The broad goal of this volume is to help advance environmental education practices that help increase students environmental literacy Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge skills and personal views about many contemporary environmental and sustainability issues
