Adam Kuper, 2010-02-28 Like many gentlemen of his time Darwin married his first cousin In fact marriages between close relatives were commonplace in 19th century England and Kuper argues that they played a crucial role in the rise of the bourgeoisie This study brings out the connection between private lives public fortunes and the history of imperial Britain

equality debates of the past and present The Age of Entrepreneurship Robert Bennett, Harry Smith, Carry van Lieshout, Piero Monteburro, Gill Newton, 2019-06-27 This landmark research volume provides the first detailed history of entrepreneurship in Britain from the nineteenth century to the present Using a remarkable new database of more than nine million entrepreneurs it gives new understanding to the development of Britain as the world's first industrial nation Based on the first long term whole population analysis of British small business it uses novel methods to identify from the 10 yearly population census the two to four million people per year who operated businesses in the period 1851-1911 Using big data analytics it reveals how British businesses evolved over time supplementing the census derived data on individuals with other sources on companies and business histories By comparing to modern data it reveals how the late Victorian period was a golden age for smaller and medium sized business driven by family firms the accelerating participation of women and the increasing use of incorporation as significant vehicles for development A unique resource and citation for future research on entrepreneurship of crucial significance to economic development policies for small business around the world and above all the key entry point for researchers to the database which is deposited at the UK Data Archive this major publication will change our understanding of the scale and economic significance of small businesses in the nineteenth century **History and Financial Crisis** Christopher Kobrak, Mira Wilkins, 2014-06-11 One striking weakness of our financial architecture which helped bring on and perhaps deepen the Panic of 2008 is an inadequate appreciation of the past Information about how the system functioned and the reliability of organizations and institutional controls were drawn from a relatively narrow group of recent examples History and Financial Crisis Lessons from the 20th Century is an attempt to broaden the range of historical sources used by policy makers to understand and treat financial crises Many recent discussions of the 2008 panic and the economic turmoil have found the situation to either be unprecedented or greatly similar to that of 1931 However the book's wide range of contributors suggest that the economic crisis of 2008 cannot be categorised in this way This book was originally published as a special issue of Business History *Men, Women, and Money* David R. Green, 2011-04-28 There has been considerable research into the growth of limited companies in Great Britain in the 19th century but not much is known about their investors both men and women This interdisciplinary book based on new research investigates the identity and behaviour of these investors *The New Cambridge Bibliography of English Literature: Volume 4, 1900-1950* George Watson, I. R. Willison, 1972-12-07 More than fifty specialists have contributed to this new edition of volume 4 of The Cambridge Bibliography of English Literature The design of the original work has established itself so firmly as a workable solution to the immense problems of analysis articulation and coordination that it has been retained in all its essentials for the new edition The task of the new contributors has been to revise and integrate the lists of 1940 and 1957 to add materials of the following decade to correct and refine the bibliographical details already available and to re shape the whole according to a new series of conventions devised to give greater clarity and consistency to the entries Reconstruction Neal

Shasore, Jessica Kelly, 2023-02-23 Commendation the Colvin Prize 2023 Society of Architectural Historians of Great Britain
Reconstruction explores the impact of the First World War on the built environment examining the immediate and longer term aftermath of the Great War on the architecture of Britain and the British Empire during the interwar years While much attention has been paid by historians to post war architectural reconstruction after 1945 the earlier developments of the interwar period 1919 1939 have been comparatively overlooked This volume reveals how the architectural developments of this period not only provided important foundations for what happened after 1945 they are also of real significance in their own right Sixteen essays written by leading and emerging scholars bring together new and diverse approaches to the period a period of reconstruction fraught with the challenges of modernity and democratisation The collection considers the complex effects of reconstruction on design discourse practice and professionalism and deals with the full spectrum of architectural styles and approaches privileging neither Modernism nor traditional styles like the neo Georgian It brings to the fore social and political histories of the built environment and makes important postcolonial interventions into the architectural history of British Imperialism at home and in its far reaches in Cairo South Africa Australia and India

Handbook of Finance and Development Thorsten Beck, Ross Levine, 2018-07-27 This Handbook provides a comprehensive overview of the relationship between financial and real sector development The different chapters written by leading contributors in the field survey research on the importance of financial development for economic growth the causes and consequences of financial fragility the historic development of financial systems in several major economies and regions of the world and the regulatory and supervisory underpinnings of financial sector development **Family Firms in Postwar Britain and Germany** David Paulson, 2023 Examines the culture and conduct of six small and medium sized enterprises SMEs in England and West Germany from 1945 to the late 1970s drawing on numerous archives in Germany and Britain This is the first book length study that examines the detailed histories of SMEs in a comparative transnational manner Emerging from this study is an evaluation of German and British varieties of capitalism in action showing that they were not fixed or static but rather have changed considerably as they evolved over time The German companies studied formed part of the Mittelstand the family owned sector which is unique to German speaking countries This book explores whether the principles of a close identification with the surrounding region and a patriarchal culture within a family atmosphere were adopted in practice then and whether they are still applicable today Paulson compares the Mittelstand to British SMEs in order to understand how their approach differed from that of their German counterparts For both countries the ecosystem which surrounded businesses is examined paying particular attention to funding and vocational education The book concludes that the potential for a British Mittelstand existed but that British companies were often less well managed and had to operate within a less supportive external environment than that which favoured the Mittelstand Historical lessons learned from the management of these companies still resonate today and can help us to understand contemporary differences in business

performance This book will therefore be of interest to scholars and students of twentieth century business and economic history as well as management studies
