Dynamic Risk Factors Tony Ward,Clare-Ann Fortune,2018-10-25 Dynamic risk factors are the children of risk prediction They were identified to help practitioners assess risk of recidivism and to set treatment targets likely to reduce reoffending This resulted in the development of intervention programs designed to modify the characteristics of individuals and their environments associated with crime The predictive nature of their legacy lies in their ability to provide reliable information about the likelihood of future reoffending In this respect dynamic risk factors are useful complements to static risk factors such as age gender and history of offending and add incremental validity to recidivism prediction Their treatment utility resides in the fact that practitioners increasingly rely on the identification of dynamic risk factors to direct correctional assessment and interventions Thus dynamic risk factors have a dual status They are both useful predictors of reoffending and measures of risk status and potential causes of

reoffending capable of serving an explanatory role as well as a predictive one It is a simple and powerful conceptualization that has streamlined forensic and correctional research program development and the delivery of treatment Despite its conceptual elegance we believe that the dual conceptualization of dynamic risk factors is problematic and these difficulties spill over into their role in assessment assessment treatment and desistance contexts In this publication the nature and function of dynamic risk factors are investigated and their strengths and limitations identified This book was originally published as a special issue of Psychology Crime and Law *Policing at the Top* Bryn Caless,2011 Chief police officers make far reaching strategic command decisions about policing armed responses operations against criminals and allocation of resources yet they are often unknown even to their forces In this ground breaking social study Bryn Caless presents their frank and sometimes controversial views Destructive Leadership in the Workplace and its Consequences Vicki Webster,Paula Brough,2021-11-24 With relevance across public private and not for profit sectors and combining perspectives from both the business and psychology worlds this book is a cross disciplinary look at how destructive leaders can impact organisations and their workers and how best to recognise and deal with them This text bridges the gap between the theory and the practical application by taking the academic research and translating this for students managers and practitioners in the field into practicable interventions they can use in their everyday practice to recognise and resolve issues raised by destructive leaders Using case studies throughout this guide takes the theory and places it in the real world helping readers take the theory beyond the page and apply it to their practice Criminology Tim Newburn,2017-02-22 Comprehensive and accessible Tim Newburn s bestselling Criminology provides an introduction to the fundamental themes concepts theories methods and events that underpin the subject and form the basis for all undergraduate degree courses and modules in Criminology and Criminal Justice This third edition includes A new chapter on politics reflecting the ever increasing coverage of political influence and decision making on criminology courses New and updated crime data and analysis of trends plus new content on recent events such as the Volkswagen scandal the latest developments on historic child abuse as well as extended coverage throughout of the English riots A fully revised and updated companion website including exam review and multiple choice questions a live Twitter feed from the author providing links to media and academic coverage of events related to the concepts covered in the book together with links to a dedicated textbook Facebook page Fully updated to reflect recent developments in the field and extensively illustrated this authoritative text written by a leading criminologist and experienced lecturer is essential reading for all students of Criminology and related fields Find online resources for both students and instructors at <https://routledge-textbooks.com/textbooks/9781138643130> *The Rise and Fall of the Right of Silence* Hannah Quirk,2016-11-25 Within an international context in which the right to silence has long been regarded as sacrosanct this book provides the first comprehensive empirically based analysis of the effects of curtailing the right to silence The right to silence has served as the practical expression of the principles that an individual was to be considered

innocent until proven guilty and that it was for the prosecution to establish guilt In 1791 the Fifth Amendment to the US Constitution proclaimed that none shall be compelled in any criminal case to be a witness against himself In more recent times the privilege against self incrimination has been a founding principle for the International Criminal Court the new South African constitution and the ad hoc International Criminal Tribunals for Rwanda and the former Yugoslavia Despite this pedigree over the past 30 years when governments have felt under pressure to combat crime or terrorism the right to silence has been reconsidered as in Australia curtailed in most of the United Kingdom or circumvented by the creation of the military tribunals to try the Guantanamo detainees The analysis here focuses upon the effects of the Criminal Justice and Public Order Act 1994 in England and Wales There curtailing the right to silence was advocated in terms of common sense policy making and was achieved by an eclectic borrowing of concepts and policies from other jurisdictions The implications of curtailing this right are here explored in detail with reference to England Wales and Northern Ireland but within a comparative context that examines how different types of legal systems regard the right to silence and the effects of constitutional protection

Why We Kill Nancy Loucks, Sally Smith Holt, Joanna R. Adler, 2013-01-11 Infanticide serial killings war terrorism abortion honour killings euthanasia suicide bombings and genocide all involve taking of life Put most simply all involve killing one or more other people Yet cultural context influences heavily how one perceives all of these and indeed some readers of this paragraph may already have thought But surely that doesn't belong with those others that's not really killing Why We Kill examines violence in many of its manifestations exploring how culture plays a role in people's understanding of violent action From the first chapter which tries to understand multiple forms of domestic homicide including infanticide filicide spousal homicide and honour killings to the final chapter's bone chilling account of the massacre at Murambi in Rwanda this fascinating book makes compelling reading

Farrington, 2015-07-24 Criminal Recidivism intends to fill a gap in the criminological psychology literature by examining the processes underlying persistent criminal careers This book aims to investigate criminal recidivism and why how and for how long an individual continues to commit crimes whilst also reviewing knowledge about risk assessment and the role of psychopathy including neurocriminological factors in encouraging recidivism It also focuses on the recidivism of sex offenders and on what works in reducing reoffending At an empirical level this book attempts to explain criminal persistence and recidivism using longitudinal data from the Cambridge Study in Delinquent Development CSDD At a psycho-criminological level it joins together quantitative and qualitative analyses making its content a practical guide to explain predict and intervene to reduce the risk of criminal recidivism The authors present quantitative analyses of criminal careers as well as qualitative life histories of chronic offenders in order to bring home the reality and consequences of a life of crime The book is aimed not only at advanced students and academics in psychology criminology probation studies social sciences psychiatry sociology political science and penology but also at decision makers policy officials and practitioners within the
