splice white wire into
two and connect to
each light studs

Trailers over 80" need (3) RED marker lights on back.

The tail lights dont have a ground wire to attach - Look inside the tail light assembly of each tail light and you will see that the lights are ground via contact with the mounting studs!

This wont work with an adapter (tail light harness brain) that your installer installed unless it gets all the ground back to it?!?! get it?? so disconnect the white ground from the trailer body, and splice it to the two light mounts.
