As water treatment is rapidly becoming a global challenge due to the increasing complexity and number of the various pollutants, present the book explores fundamental issues relating to environmental applications of nanomaterials. It addresses relevant topics ranging from electrochemical synthesis and characterization to applications of photoanodes in corrosion prevention and biosensors for wastewater treatment. Featuring up to date experimental results on nanomaterials for detection of pharmaceuticals and heavy metals in wastewater, this contributed volume is useful to electrochemical researchers, materials scientists and chemical and civil engineers interested in advanced photoelectrochemical research for environmental applications **Photography, Truth and Reconciliation** Melissa Miles, 2020-08-05 *Photography Truth and Reconciliation* charts the connections between photography and a crucial issue in contemporary social history. The book examines the prevalence of photography in cultural responses to processes of truth and reconciliation and argues that photographs are a valuable means through which stories can be retold and historiography can be rethought. Five compelling case studies from Argentina, Canada, Australia, South Africa and Cambodia underscore the special role that this medium has played in facilitating processes of recovery and in reconstructing suppressed histories even when a documentary record of the events does not exist. The diverse practices addressed in this book including artistic, protest, institutional, archival, legal and personal photography prompt a new consideration of photography's links to presence, place, time, spectatorship and justice. Collectively, these practices attest to photography's key role in transitional justice and in shaping historical understanding internationally. Important reading for students taking photography, visual culture, history.

and media studies courses Photography Truth and Reconciliation explores key historical and theoretical themes including photography and testimony international discourses on human rights and justice and problematic notions of public and collective memory The introduction and conclusion of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>

year 2020 marked five years post the adoption of the SDGs with increased calls for stock taking of progress made amid strong calls for a decade of action to accelerate the delivery of the SDGs by 2030. These calls have been louder now given the impact of the COVID 19 pandemic which reset the global economy and increased intensity of extreme weather events across the world. Since climate change has emerged as one of the biggest threats to the achievement of the SDGs there has been growing concerns on its impact on biodiversity loss and the extinction of some species. There are also concerns regarding increased food insecurity at the household level in some parts of the world particularly in Asia and Africa. With the demand for climate change action on the increase there have also been growing calls for the big carbon emitters to drastically cut their emissions and invest in clean energy to save the planet by following development pathways making emissions stay under the 1.5°C increase in temperature.

Cyclones in Southern Africa Godwell Nhamo, Kaitano Dube, 2021-07-24. The subject of tropical cyclones in Southern Africa also known as hurricanes or typhoons in other regions of the world has been growing over the past few decades. However there is still limited literature on foundational and fundamental topics on the matter. To this end this book addresses this gap citing some examples from both historic and recent tropical cyclones. The book presents meteorological and climatic aspects of tropical cyclones including reviews on forecasting, warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth. Fundamentals in disaster risk reduction (DRR) are also discussed moving from the provisions of the Hyogo Framework for Action 2005-2015 to the Sendai Framework for Disaster Risk Reduction 2015-2030. Climate change issues are central to the publication as well as the role of information and communication technologies in DRR and management. The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR. The book comes as part of a series with three volumes. The other volumes include Cyclones in Southern Africa Vol 1: Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe and Cyclones in Southern Africa Vol 3: Implications for the Sustainable Development Goals. To this end this book is suitable as a read for several professionals and disciplines such as tourism and hospitality studies, economics, sustainable development, development studies, environmental sciences, arts, geography, life sciences, politics, planning and public health.
