Balkan Sprachbund Morpho-Syntactic Features Olga M. Tomic,2006-09-13 At the end of 1998 Professor Pieter Muysken was awarded the Spinoza prize of the Netherlands Organization of Scientific Research NOW and set up a research program entitled Lexicon and Syntax The implementation of the Program started in the autumn of 1999 with research on the lexicon and syntax in a number of areas where contacts between 1 different languages are intensive For the languages of many of the areas selected basic data had to be collected For most of the languages of the Balkan Sprachbund area however there are grammars and dictionaries Moreover quite a number of studies of the Balkan Sprachbund features have been published Accordingly when I joined the team of the Project I aimed at a description of the state of art in the field After several months of research I realized that Balkanists have mainly been concerned with compiling lists of similarities and making parallels between the lexical and grammatical forms of the Balkan languages while analyses of the interaction of the Balkan Sprachbund morpho syntactic features with other features in the structure of the DP or the sentence of a given language dialect are scarce This oriented me towards descriptions of Balkan Sprachbund morpho syntactic features in the context of individual sub systems in nine Balkan language to which they relate the Slavic languages Macedonian Bulgarian and Serbo Croatian the Romance languages Romanian Aromanian and Megleno Romanian Albanian Modern Greek and the Arli Balkan Romani dialect

Volume 7 Laura Brugé, Anna Cardinaletti, Giuliana Giusti, Nicola Munaro, Cecilia Poletto, 2012-06-20 Over the last two decades functional heads have been one of the privileged objects of research in generative linguistics. However, within this line of inquiry, two alternative approaches have developed while the cartographic project considers crosslinguistic evidence as crucial for a complete mapping of functional heads in universal grammar. Minimalist accounts tend to consider structural economy as literally involving a reduction in the number of available heads. In this volume, some of the most influential linguists who have participated in this long-lasting debate offer their recent work in short, self-contained case studies. The contributions cover all the main layers of recently studied syntactic structure, including such major areas of empirical research as grammaticalization and language change, standard and non-standard varieties, interface issues, and morphosyntax. *Functional Heads* attempts to map aspects of syntactic structure according to the cartographic approach, and in doing so demonstrates that the differences between cartography and minimalism are perhaps more superficial than substantial.

Sevartham, 1985 **The Kid with Big, Big Ideas** Britney Winn Lee, 2023-08-29 There once was a kid with glittery nails who always wore colorful socks, and all around town this child was known for thinking outside of the box. Following the bestselling *The Boy with Big, Big Feelings* and *The Girl with Big, Big Questions*, comes a new story about a kid with ideas so big and wild that grown-ups often dismiss them. What if we could be mermaids and swim to school? What if we could teach pets to talk? What if we could make the world safe and inclusive for everyone? This innovative kid doesn't stop there, and with the help of their supportive Gran, they come up with the biggest idea yet. In a world that so often dismisses and excludes kids from decision-making, this book boldly suggests that not only should kids have a voice, but that their ideas just might be the ticket to making progress. *History of American Missions to the Heathen, from Their Commencement to the Present Time*
