Opening The Box of Delights [new Edition] Philip W. Errington, 2024-09-30 *The Box of Delights Part 1*, **Landscape in Children's Literature** Jane Carroll, 2012-08-06

This book provides a new critical methodology for the study of landscapes in children's literature Treating landscape as the integration of unchanging and irreducible physical elements or topoi Carroll identifies and analyses four kinds of space sacred spaces green spaces roadways and lapsed spaces that are the component elements of the physical environments of canonical British children's fantasy Using Susan Cooper's The Dark Is Rising Sequence as the test case for this methodology the book traces the development of the physical features and symbolic functions of landscape topoi from their earliest inception in medieval vernacular texts through to contemporary children's literature The identification and analysis of landscape topoi synthesizes recent theories about interstitial space together with earlier morphological and topoanalytical studies enabling the study of fictional landscapes in terms of their physical characteristics as well as in terms of their relationship with contemporary texts and historical precedents Ultimately by providing topoanalytical studies of other children's texts Carroll proposes topoanalysis as a rich critical method for the study and understanding of children's literature and indicates how the findings of this approach may be expanded upon In offering both transferable methodologies and detailed case studies this book outlines a new approach to literary landscapes as geographical places within socio historical contexts

Pagan Themes in Modern Children's Fiction P. Bramwell, 2009-03-31 Applying a range of critical approaches to works by authors including Susan Cooper Catherine Fisher Geraldine McCaughrean Anthony Horowitz and Philip Pullman this book looks at the formative and interrogative relationship between recent children's literature and fashionable but controversial aspects of modern Paganism

How Did Long John Silver Lose his Leg Dennis Butts, Peter Hunt, 2013-11-28 How did Long John Silver Lose His Leg is a diverting tour through some of the bestloved classics of children's literature addressing many of the unanswered questions that inspire intense speculation when the books are laid down Could Bobbie's train really have stopped in time The Railway Children Did Beatrix Potter have the flu in 1909 and did this lead to a certain darkness in her work The Tale of Mr Tod Would the rugby football played by Tom Brown be recognised by sportsmen today Tom Brown's Schooldays The authors speculate entertainingly and informatively on the anomalies and unexplained phenomena found in children's literature and having established the cultural importance of children's books in the modern age also consider the more serious issues raised by the genre Why are we so defensive of the idyllic worlds presented in children's books Why have some of our best loved authors been outed as neglectful parents to their own children Should we ever separate the book from its creator and appreciate the works of writers convicted of crimes against

children A treat for any enthusiast of children's literature two of the most distinguished writers on the subject provide rich detail witty explication and serious food for thought **The Golden Age of Children's TV** Tim Worthington, 2024-10-24 For decades British children's TV was surely the finest entertainment in the world From Thunderbirds to The Clangers Blue Peter to Magpie Camberwick Green to Tiswas and Captain Pugwash to The Magic Roundabout there was a huge variety on offer for kids and adults to enjoy Now in The Golden Age of Children's TV Tim Worthington brings back the joy of those times and the programmes we loved sharing a deep dive behind the scenes of key programmes how they came about and the stories behind the shows From Saturday morning telly to teatime favourites discover everything you never knew about the programmes you loved as well as the gossip from behind the scenes Written with affection but also with a wry appreciation of the shortcomings of the times this is the hugely engaging and entertaining story of a key part of our pop culture from a time long before streaming and the internet when we sat down together to watch brilliant British telly *The Year of the Geek* James Clarke, 2017-10-19 The Year of the Geek is a fascinating look into geek culture Each day will tell a different story from the sci fi universe from famous franchises and figures such as Star Wars The Matrix Peter Jackson and Luc Besson to lesser known stories including the French cult classic City of Lost Children the Japanese anime Akira and bestselling German novelist Marcus Heitz With text written by self confessed geek James Clarke and accompanied by over 100 infographics that have been specially commissioned for this book The Year of the Geek celebrates all things geek in a new and intriguing way

Channeling the Future Lincoln Geraghty, 2009-04-02 Though science fiction certainly existed prior to the surge of television in the 1950s the genre quickly established roots in the new medium and flourished in subsequent decades In Channeling the Future Essays on Science Fiction and Fantasy Television Lincoln Geraghty has assembled a collection of essays that focuses on the disparate visions of the past present and future offered by science fiction and fantasy television since the 1950s and that continue into the present day These essays not only shine new light on often overlooked and forgotten series but also examine the look of science fiction and fantasy television determining how iconography location and landscape special effects set design props and costumes contribute to the creation of future and alternate worlds Contributors to this volume analyze such classic programs as The Twilight Zone Voyage to the Bottom of the Sea and The Man from U N C L E as well as contemporary programs including Star Trek The Next Generation Angel Firefly Futurama and the new Battlestar Galactica These essays provide a much needed look at how science fiction television has had a significant impact on history culture and society for the last sixty years *Breaking into the Curriculum* John F. Schostak, 2020-03-13 Information technology is here to stay Its impact has already been far reaching in business in communications and in leisure activities it has been responsible for replacing human action by that of machines As such it raised questions about freedom and the meaning of work and human activity which could no longer be ignored by those working in education The educational response to information technology must ensure that human activities are enhanced rather than enslaved by

computers Originally published in 1988 *Breaking into the Curriculum* provides one such response A range of curricular structures and teacher roles are examined for their potential for preserving freedom in a future that was already being formed and informed by electronic systems Drawing on case studies of pupils and teachers from throughout their school career the authors of this collection sought to provoke discussion on the true ends of education and the kinds of strategies that would best realise those ends Information technology it is argued is already shaping our thinking concerning the schooling of children As such it can either create an electronically controlled environment or it can provide the stimulus for imaginative playful and creative thought and the development of intelligence in its broadest sense The choice is ours the authors of this collection seek to inform that choice Today it can be read in its historical context **The Box of Delights**

Provides articles covering children's literature from around the world as well as biographical and critical reviews of authors including Avi C S Lewis J K Rowling and Anno Mitsumasa *The Four-Dimensional Human: Ways of Being in the Digital World* Laurence Scott, 2016-08-09

You are a four dimensional human Each of us exists in three dimensional physical space But as a constellation of everyday digital phenomena rewires our lives we are increasingly coaxed from the containment of our predigital selves into a wonderful and eerie fourth dimension a world of ceaseless communication instant information and global connection Our portals to this new world have been wedged open and the silhouette of a figure is slowly taking shape But what does it feel like to be four dimensional How do digital technologies influence the rhythms of our thoughts the style and tilt of our consciousness What new sensitivities and sensibilities are emerging with our exposure to the delights sorrows and anxieties of a networked world And how do we live in public with these recoded private lives Laurence Scott hailed as a New Generation Thinker by the Arts and Humanities Research Council and the BBC shows how this four dimensional life is dramatically changing us by redefining our social lives and extending the limits of our presence in the world Blending tech philosophy with insights on everything from Seinfeld to the fall of Gaddafi Scott stands with a rising generation of social critics hoping to understand our new reality His virtuosic debut is a revelatory and original exploration of life in the digital age **Poetry and the Realm of the Public Intellectual** Karen Patricia Peña, 2007

In this study we see how Gabriela Mistral travels to Mexico and finds the countryside a way to declare her own queer identity many years later we find her reimagining a frightening feminine space where she contests the terrible fate of Greek heroines In Cecilia Meireles we discover a writer at odds with her femininity who declares herself androgynous Like Mistral she too travelled extensively and we see her arguing against the wealth of capitalism and industrialization when she travels to the United States in 1940 Rosario Castellanos straightforwardly argues for women's procreative rights in almost all of her poetry And in an illuminating re-reading of Mistral Castellanos allows the shadow of her predecessor to vocalize the tragedies of the inability to control woman's reproductive choices Book jacket [The Collected Letters of C.S. Lewis, Volume 3](#) C. S. Lewis, 2004 The letters

found in Volume II reveal inside accounts of how The Screwtape Letters came to be written the early meetings of the Inklings with J R R Tolkien giving readings about hobbits and Middle Earth how C S Lewis became popular through BBC radio talks but mostly how this quiet professor in England touched the lives of many through an amazing discipline of personal correspondence
