The Bren Gun Saga Thomas B Dugleby Edited by R. Blake Stevens Thomas B. Dugelby,1986 **The Bren Gun** Neil Grant,2013-07-20 Adopted in 1938 and remaining in British service until 1991 the popular and reliable Bren was an iconic light machine gun and arguably the most recognizable Commonwealth weapon of World War II Gas operated and magazine fed it was based on a Czech design and was issued in large numbers during and after World War II as a section level automatic weapon Offering remarkable accuracy for an LMG the Bren had an effective range of 600 yards but could reach out to over 1 500 yards It was generally fired from the prone position using a bipod but could be fired from the hip when necessary If kept clean the Bren gave a reliable service in the harshest of environments from the deserts of Libya to the Korean mountains in winter As well as widespread infantry use the Bren was widely supplied to resistance movements in Occupied Europe Featuring specially commissioned full colour artwork and based on meticulous research this is an engaging story of the iconic light machine gun that equipped British and Commonwealth forces throughout World War II and in a host of postwar conflicts right up to the Falklands and beyond **The Saga Of San Demetrio** F. Second World War but over decades In this comprehensive book Stephen Bull examines every aspect of the British Army during the Second World War and considers in detail the strengths and weaknesses of an organisation that was tested to its limits on many fronts but made an immense contribution to the successful Allied outcome The book explores the structure of military power from the men who ran it the Generals to the detail of the regiments they commanded It looks at the uniforms the soldiers wore and the badges and insignia they bore on their uniforms The weaponry Churchill's army used is discussed in detail from small arms including rifles bayonets grenades carbines and machine guns to the massed firepower of the artillery along with the increasing sophistication of tanks and other military vehicles during the period Finally the role of auxiliary and special forces and their contribution to the campaign is considered The comprehensive text is enhanced by more than 200 contemporary photographs

Armies of Empire Allan Converse, 2011-04-07 Armies of Empire uniquely reflects upon the experience of two divisions from different armies facing similar challenges in the Second World War The 9th Australian Division and the British 50th Northumbrian Division both saw long service and suffered heavy casualties and both encountered morale discipline and battlefield effectiveness problems In this illuminating comparative study of Australian and British divisions at war Allan Converse draws extensively on primary sources as well as recent scholarship on morale and combat efficiency His fresh approach questions the popular mythology surrounding the Australian Digger and the British Tommy and shows how it was a combination of leadership loyalty and tactics rather than intrinsic national qualities which resulted in victory for Churchill's armies

In the Shadow of Munich. British Policy towards Czechoslovakia from 1938 to 1942 Vít Smetana, 2008-01-01 The book In the Shadow of Munich British Policy towards Czechoslovakia from the Endorsement to the Renunciation of the Munich Agreement 1938 to 1942 analyses the varying attitudes and gradual change of British policy towards Czechoslovakia in the period from the Munich Conference in September 1938 to August 1942 when the British government proclaimed the Munich Agreement as dead and thus having no influence whatsoever on the future territorial settlement The key focus of this work lies in the influence of Munich upon the British political scene and upon the resulting British policy towards Czechoslovakia in the Central European context and also in the repercussions of Munich in negotiations with the Czechoslovak exile representatives The book is a result of many years of the author's research conducted primarily in the British and the Czech archives as well as his reflection of numerous documentary editions diaries memoirs and secondary sources It aims to dispel frequent myths and stereotypes that have so far influenced the Czech and partly also Anglo Saxon historiography in their interpretations of British attitudes towards Czechoslovakia immediately before and during the Second World War
