Sweet Buttcoins Dimitris Vareltzidis, 2024-06-03 Sweet Buttcoins is about women and investments in cryptocurrencies cryptos They are both sweet to learn but very difficult to understand and master One of the few girls who knew nothing about Bitcoins referred to them as Buttcoins which was actually a very sweet mistake that inspired me to come up with the title of the book My cryptos investments in 2022 were the best canvas to paint an interesting story A real events story that combines my new endeavor in the cryptos world interacting with women online and my studies and experience in business administration economics business negotiations strategy and marketing as well as my hobbies In this fascinating new world I chose to live from February 2022 luck plays a very important role In cryptos it is extremely difficult to distinguish real professionals from scammers But as stated by Tom Cruise in the opening narration of legendary Color of Money a 1986 movie directed by Martin Scorsese starring Paul Newman and Tom Cruise as professional pool players Luck plays a part in nine ball But for some players luck itself is not I believe the story is interesting as it is inspired by real events but it is even better if the reader listens to the songs and views movie trailers as

their titles appear in it in italics or with their initials capitalized to recognize them The songs movies and series mentioned in the book as integral parts of the story are listed as appendix 1 for readers to enjoy ideally simultaneously to reading the relevant sections of the book The punchlines of the book are the following a cryptos are a goldmine but also a minefield and b in investments and relationships trust is the most important factor *FFIT 2022* Holger Haldenwang, George Yuan, Zhiping Jiang, 2023-04-14 The 2022 International Conference on Financial Innovation FinTech and Information Technology FFIT 2022 hosted by Shenzhen University of Technology and organized by the Financial Innovation and Fintech Research Center of Shenzhen University of Technology was held on October 28 30 2022 in Shenzhen China Due to the current COVID 19 pandemic and the strict travelling rules it is still difficult to take international travel for all our attendees to participate in the conference Therefore FFIT 2022 was held as a hybrid event FFIT 2022 brought together innovative academics and industrial experts in the field of Financial Innovation Financial Technology and Information Technology to discuss the latest research results in this field *Subterranean Estates* Hannah Appel, Arthur Mason, Michael Watts, 2015-06-24 Oil is a fairy tale and like every fairy tale is a bit of a lie Ryszard Kapuscinski Shah of Shahs The scale and reach of the global oil and gas industry valued at several trillions of dollars is almost impossible to grasp Despite its vast technical expertise and scientific sophistication the industry betrays a startling degree of inexactitude and empirical disagreement about foundational questions of quantity output and price As an industry typified by concentrated economic and political power its operations are obscured by secrecy and security Perhaps it is not surprising then that the social sciences typically approach oil as a metonym of modernity money geopolitics violence corruption curse or commodity rather than considering the daily life of the industry itself and of the hydrocarbons around which it is built *Subterranean Estates* gathers an interdisciplinary group of scholars and experts to instead provide a critical topography of the hydrocarbon industry understood not solely as an assemblage of corporate forms but rather as an expansive and porous network of laborers and technologies representation and expertise and the ways of life oil and gas produce at points of extraction production marketing consumption and combustion By accounting for oil as empirical and experiential the contributors begin to demystify a commodity too often given almost demiurgic power *Subterranean Estates* shifts critical attention away from an exclusive focus on global oil firms toward often overlooked aspects of the industry including insurance finance law and the role of consultants and community organizations Based on ethnographic research from around the world Equatorial Guinea Nigeria Oman the United States Ecuador Chad the United Kingdom Kazakhstan Canada Iran and Russia and featuring a photoessay on the lived experiences of those who inhabit a universe populated by oil rigs pipelines and gas flares this innovative volume provides a new perspective on the material symbolic cultural and social meanings of this multidimensional world *SEC Docket* United States. Machine Learning in Medicine - A Complete Overview Ton J. Cleophas, Aeilko H. Zwinderman, 2020-03-03 Adequate health and health care is no longer possible without proper data supervision from modern machine learning methodologies like cluster models neural networks and other data mining methodologies The current book is the first publication of a complete overview of machine learning methodologies for the medical and health sector and it was written as a training companion and as a must read not only for physicians and students but also for any one involved in the process and progress of health and health care In this second edition the authors have removed the textual errors from the first edition Also the

improved tables from the first edition have been replaced with the original tables from the software programs as applied. This is because unlike the former the latter were without error and readers were better familiar with them. The main purpose of the first edition was to provide stepwise analyses of the novel methods from data examples but background information and clinical relevance information may have been somewhat lacking. Therefore each chapter now contains a section entitled Background Information. Machine learning may be more informative and may provide better sensitivity of testing than traditional analytic methods may do. In the second edition a place has been given for the use of machine learning not only to the analysis of observational clinical data but also to that of controlled clinical trials. Unlike the first edition the second edition has drawings in full color providing a helpful extra dimension to the data analysis. Several machine learning methodologies not yet covered in the first edition but increasingly important today have been included in this updated edition for example negative binomial and Poisson regressions, sparse canonical analysis, Firth's bias adjusted logistic analysis, omics research, eigenvalues and eigenvectors.

Right money Hulusi Armutcu, 2018-09-18 There are many people who want to get rid of the world order we live in and the boundaries dictated by it and live an alternative life. Everyone's dream is different but they all come together on the basis of getting rid of offices that restrict freedom of movement and money that makes our life harder. I wanted to show you ways to make money and your dreams come true. Before beginning I want to clarify something to avoid disappointment. It is not a convenient way for those who want to be rich by not working hard. On the contrary you will probably work a lot more than your salaried business life because it is your own business. It does not mean that being on the Internet does not have seriousness. A business calendar that you have to follow closely, a customer satisfaction that needs to be taken seriously, things like job follow up also apply to online jobs. The only difference is that it gives you space and time freedom which is a terrific achievement in our business and a factor that lifts many obstacles in front of your dreams. I will also tell you where to find the appropriate capital for the business you want to set up in this article. It is very important that you get this capital because you need a certain amount of savings even when you make money from the internet. You can also set up lower budget jobs with the capital you will get. I will tell you how to work with the internet and how to get new opportunities by using technology at low cost.
