The Blackwell Guide To Epistemology:

The Blackwell Guide to Epistemology John Greco, Ernest Sosa, 1999 **Epistemology** Ernest Sosa, 2017-01-17 One of the world's leading epistemologists provides a sophisticated revisionist introduction to the subject In this concise book one of the world's leading epistemologists provides a sophisticated revisionist introduction to the problem of knowledge in Western philosophy Modern and contemporary accounts of epistemology tend to focus on limited questions of knowledge and skepticism such as how we can know the external world other minds the past through memory the future through induction or the world's depth and structure through inference This book steps back for a better view of the more general issues posed by the ancient Greek Pyrrhonists Returning to and illuminating this older broader epistemological tradition Ernest Sosa develops an original account of the subject giving it substance not with Cartesian theology but with science and common sense Descartes is a part of this ancient tradition but he goes beyond it by considering not just whether knowledge is possible at all but also how we can properly attain it In Cartesian epistemology Sosa finds a virtue theoretic account one that he extends beyond the Cartesian context Once epistemology is viewed in this light many of its problems can be solved or fall away The result is an important reevaluation of epistemology that will be essential reading for students and teachers *The Blackwell Guide to Ancient Philosophy* Christopher Shields, 2008-04-15 The Blackwell Guide to Ancient Philosophy provides a comprehensive treatment of the principal figures and movements of philosophy from its origins before Socrates through the towering achievements of Plato and Aristotle and into its final developments in late antiquity Provides a comprehensive guide to ancient philosophy from the pre Socratics to late antiquity Written by a cast of distinguished philosophers Covers the pre Socratics the sophistic movement Epicureanism academic skepticism stoicism and the neo Platonists Features an index and a comprehensive bibliography of both primary and secondary works *The Blackwell Guide to the Philosophy of Education* Nigel Blake, Paul Smeyers, Richard D. Andrew Kirk, 2016-12-05 Focusing on the history of ideas this book explores important questions concerning knowledge in relation to philosophy science ethics and Christian faith Kirk contributes to the current debate about the intellectual basis and integrity of Western culture exploring controversial issues concerning the notions of modernity and post modernity Repositioning the Christian faith as a valid dialogue partner with contemporary secular movements in philosophy and ethics Kirk seeks to show that in post Christian Europe the Christian faith still possesses intellectual resources worthy to be reckoned with This book's principal argument is that contemporary Western society faces a cultural crisis It explores what appears to be an historical enigma namely the question of why Western intellectual endeavours in philosophy and science seem to have abandoned the search for a source of knowledge able to draw together disparate pieces of information provided by different disciplines Kirk draws conclusions particularly in the area of ethical decision making from this apparent failure and invites readers to consider Christian theism afresh as a means for the renewal of culture and society **TREATISE ON THE NEUROPHILOSOPHY OF CONSCIOUSNESS** Dr. Angell O. de la Sierra, Esq., 2012-08 I would like to invite all those studious of the mind brain interface puzzle to share our insights What follows represents an ongoing series of reflections on the ontology of consciousness based on some intuitions on life language acquisition and

survival strategies to accommodate the biological psychic and social imperatives of human life in its ecological niche thus the BPS model For the latest publication click on BPS Model <http://www.delaSierraSheffer.net/ID/Neurophilo.net/index.htm>

what if we cannot know reality on that basis What if the institution of science is threatened by its reliance on naturalism R Scott Smith argues in a fresh way that we cannot know reality on the basis of naturalism Moreover the fact value split has failed to serve our interests of wanting to know reality The author provocatively argues that since we can know reality it must be due to a non naturalistic ontology best explained by the fact that human knowers are made and designed by God The book offers fresh implications for the testing of religious truth claims science ethics education and public policy Consequently naturalism and the fact value split are shown to be false and Christian theism is shown to be true

Dissolving the Gettier Problem John Ian K. Boongaling,2020-11-18 This book argues that a complete dissolution of the Gettier problem is possible using Jaakko Hintikka s Socratic Epistemology with its emphasis on questioning as a knowledge seeking procedure The key to accomplishing this task is to treat Gettier s counterexamples as a game of inquiry where epistemic agents deal with various

pieces of information employ different moves and make different choices or strategies such as bracketing or unbracketing an item of information in determining for themselves what to believe in or what they can claim to have knowledge of This book will appeal to both undergraduate and graduate students as well as post graduate researchers as it offers a novel perspective for understanding the Gettier problem and a cogent explanation for the failures of previously proposed solutions to it All this is made possible by going beyond analysis and dealing with the experiences of epistemic agents in actual problem solving scenarios
