The Book About Adjectives Definition Exercises And Synonyms Of Adjectives:

The Book about Adjectives Krishna Kumar Singh, 2016-12-26 Of making many English grammars there is no end nor should there be till theoretical scholarship and actual practice are more happily wedded In this field much valuable work has already been accomplished but it has been done largely by workers accustomed to take the scholar's point of view and their writings are addressed rather to trained minds than to immature learners To find an advanced grammar unencumbered with hard words abstruse thoughts and difficult principles is not altogether an easy matter These things enhance the difficulty which an ordinary youth experiences in grasping and assimilating the facts of grammar and create distaste for the study It is therefore the leading object of this book to be both as scholarly and as practical as possible In it there is an attempt to present grammatical facts as simply and to lead the student to assimilate them as thoroughly as possible and at the same time to do away with confusing difficulties as far as may be To attain these ends it is necessary to keep ever in the foreground the real basis of grammar that is good literature Abundant quotations from standard authors have been given to show the student that he is dealing with the facts of the language and not with the theories of grammarians It is also suggested that in preparing written exercises the student use English classics instead of making up sentences But it is not intended that the use of literary masterpieces for grammatical purposes should supplant or even interfere with their proper use and real value as works of art It will however doubtless be found helpful to alternate the regular reading and sthetic study of literature with a grammatical study so that while the mind is being enriched and the artistic sense quickened there may also be the useful acquisition of arousing a keen observation of all grammatical forms and usages Now and then it has been deemed best to omit explanations and to withhold personal preferences in order that the student may by actual contact with the sources of grammatical laws discover for him the better way in regarding given data It is not the grammarian's business to correct it is simply to record and to arrange the usages of language and to point the way to the arbiters of usage in all disputed cases Free expression within the lines of good usage should have widest range It has been our aim to make a grammar of as wide a scope as is consistent with the proper definition of the word Therefore in addition to recording and classifying the facts of language we have endeavored to attain two other objects to cultivate mental skill and power and to induce the student to prosecute further studies in this field It is not supposable that in so delicate and difficult an undertaking there should be an entire freedom from errors and oversights We shall gratefully accept any assistance in helping to correct mistakes We desire to express special thanks to Professor W D Mooney of Wall Mooney's Battle Ground Academy Franklin Tenn for a critical examination of the first draft of the manuscript and to Professor Jno M Webb of Webb Bros School Bell Buckle Tenn and Professor W R Garrett of the University of Nashville for many valuable suggestions and helpful criticism
