Richard P. Brief

The Called Volume 1:

In Synchrony with the Heavens, Volume 1 Call of the Muezzin David King, 2004-02-01 This is the first investigation of one of the main interests of astronomy in Islamic civilization namely timekeeping by the sun and stars and the regulation of the astronomically defined times of Muslim prayer The study is based on over 500 medieval astronomical manuscripts first identified by the author now preserved in libraries all over the world and originally from the entire Islamic world from the Maghrib to Central Asia and the Yemen The materials presented provide new insights into the early development of the prayer ritual in Islam They also call into question the popular notion that religion could not inspire serious scientific activity Only one of the hundreds of astronomical tables discussed here was known in medieval Europe which is one reason why the entire corpus has remained unknown until the present A second volume also to be published by Brill deals with astronomical instruments for timekeeping and other computing devices Lectures 1949-1968, Volume 1 Theodor W. Adorno, 2024-11-25 When Theodor W Adorno returned to Germany from his exile in the United States he was appointed as a lecturer and researcher at the University of Frankfurt and he immediately made a name for himself as a leading public intellectual Adorno s widespread influence on the postwar debates was due in part to the public lectures he gave outside of the university in which he analysed and commented on social cultural and political developments of the time This first volume brings together Adorno s lectures given between 1949 and 1968 on music literature and the arts With an engaging and improvisational style Adorno spoke with compelling enthusiasm on subjects as diverse as Marcel Proust s prose Richard Strauss s composition technique and Arnold Schoenberg s Pierrot lunaire Germany restoring its social and intellectual institutions needed to embrace the new music and writers who had been neglected particularly with regards to Proust To rebuild was taken to mean rediscovery but Adorno also nurtured a vision of tradition which far from being unthinkingly conservative would attest to society s honestly appraised relationship to the past while it underwent the process of modernization The volume illustrates Adorno s deep commitment to holding contemporary music and culture to standards commensurate with the aspirations of a modern world emerging from the horrors of war This volume of his lectures is a unique document of Adorno s startling ability to bring critical theory into dialogue with the times in which he lived It will be of great value to anyone interested in the work of Adorno and critical theory in German intellectual and cultural history and in the history of modern music and the arts The Book-Keeper and American Counting-Room Volume 1 Richard P. Brief, 2020-09-04 This book first published in 1989 contains reprints of the early periodical on accounting The Book Keeper It dealt with historical reviews of methods and systems in all ages and by all nations Elucidations of accounts introducing new and simplified features of accounting Problems from the counting room discussed and explained Instructive notes upon plans and methods of book keeping in every department of trade commerce and industry The journal is a primary source for students interested in the history of accounting The Cambridge Medieval History Series volumes 1-5 , *Code of Federal Regulations* , 1994
