## **The Care Of Life Transdisciplinary Perspectives In Bioethics And Biopolitics:**

**The Care of Life** Miguel de Beistegui, Giuseppe Bianco, Marjorie Gracieuse, 2014-12-22 This interdisciplinary collection of essays demonstrates how the ethical and political problems we are confronted with today have come to focus largely on life The contributors to this volume define and assess the specific meaning of life itself It is only by doing so that we can understand why life has become an all encompassing problem why all questions especially ethical and political have become vital questions We have reached a moment in history where every distinction and opposition is no longer in relation to life but within it and where life is at once a theoretical and practical problem This book throws light on this nexus of problems at the heart of contemporary debates in bioethics and biopolitics It helps us understand why and how life is understood valued cared for and framed today Taking a genuinely transdisciplinary approach these essays demonstrate how life is a multifaceted problem and how diverse the origins foundations and also consequences of bioethics and biopolitics therefore are

**Bioethics and Biopolitics** Péter Kakuk, 2017-10-03 This volume links three different theoretical approaches that have a common focus on the relationship between biopolitics and bioethics This collection of papers can be categorized into different domains that are representative of the contemporary usage of biopolitics as a concept On the one hand several chapters develop a clear and up to date understanding of the primary sources of the concept and related theories of Agamben Negri or Foucault and approach the question of relevance within the field of bioethics Another group of papers apply the philosophical concepts and theories of biopolitics biopower Homo Sacer biocitizenship on very specific currently debated bioethical issues Some scholars rely on the more mundane understanding of bio politics and investigate how its relationship with bioethics could be philosophically conceptualized Additionally this work also contains papers that follow a more legally oriented analysis on the effects of contemporary biopolitics on human rights and European law The authors are philosophers legal scholars or bioethicists The major strength of this volume is to provide the reader with major insights and orientation in these different contemporary usages of the concept and theories of biopolitics within the context of its various ethically relevant applications

therefore are *Forms of Life* Andreas Gailus,2020-09-15 In *Forms of Life* Andreas Gailus argues that the neglect of aesthetics in most contemporary theories of biopolitics has resulted in an overly restricted conception of life He insists we need a more flexible notion of life one attuned to the interplay and conflict between its many dimensions and forms *Forms of Life* develops such a notion through the meticulous study of works by Kant Goethe Kleist Nietzsche Wittgenstein Benn Musil and others Gailus shows that the modern conception of life as a generative organizing force internal to living beings emerged in the last decades of the eighteenth century in biological thought At the core of this vitalist strand of thought Gailus maintains lies a persistent emphasis on the dynamics of formation and deformation and thus on an intrinsically aesthetic dimension of life *Forms of Life* brings this older discourse into critical conversation with contemporary discussions of biopolitics and vitalism while also developing a rich conception of life that highlights rather than suppresses its protean character Gailus demonstrates that life unfolds in the open ended interweaving of the myriad forms and modalities of biological ethical political psychical aesthetic and biographical systems

**Vitalism and Its Legacy in Twentieth Century Life Sciences and Philosophy** Christopher Donohue,Charles T. Wolfe,2023-01-02 This Open Access book combines philosophical and historical analysis of various forms of alternatives to mechanism and mechanistic explanation focusing on the 19th century to the present It addresses vitalism organicism and responses to materialism and its relevance to current biological science In doing so it promotes dialogue and discussion about the historical and philosophical importance of vitalism and other non mechanistic conceptions of life It points towards the integration of genomic science into the broader history of biology It details a broad engagement with a variety of nineteenth twentieth and twenty first century vitalisms and conceptions of life In addition it discusses important threads in the history of concepts in the United States and Europe including charting new reception histories in eastern and south eastern Europe While vitalism organicism and similar epistemologies are often the concern of specialists in the history and philosophy of biology and of historians of ideas the range of the contributions as well as the geographical and temporal scope of the volume allows for it to appeal to the historian of science and the historian of biology generally

**Bioethics and the Posthumanities** Danielle Sands,2022-03-01 This interdisciplinary volume explores how posthumanist approaches can illuminate current issues in bioethics and considers the relevance of these issues for the humanities including questions of autonomy and authorship and notions of ethical and juridical responsibility in the context of a changing understanding of subjectivity With contributions from a variety of areas including literature philosophy media and policy making the book outlines the historical and philosophical development of posthumanism and current key questions in bioethics It generates a dialogue between bioethical approaches and the posthumanities identifying ways in which posthumanist scholarship might be used to inform bioethical policy The book also looks more speculatively at the future and the potential implications of technological developments which are only beginning to emerge It uses posthumanism to look critically at the humanism underpinning de

extinction science considers the ways in which technology is re framing our social and political imaginaries and asks about the identification of future posthumans

**Process Metaphysics and Mutative Life** Wahida Khandker, 2020-05-11 This book provides a survey of key process philosophical approaches that in conversation with selected concepts across the biological and physical sciences help us to think about living processes or lived time at different scales of functioning The first part is written from an opening perspective on the question of the differing scales of analysis provided by Alfred North Whitehead In particular his interest in questions arising from the quantum mechanical reconciliation with classical mechanics informs the first two chapters that address problematic categorizations of life as variously despotic invasive or as primitive in the radically more than human case of micro organisms whose potential recategorization relies on our willingness to acknowledge changes in value depending on the scale at which we view them The second part of the book concerns methodologies in the light of works by Henri Bergson whose intertwining concerns with epistemology and ontology in his theories of mind and life serve as a model for a process philosophy of biology The chapters focus on techniques used across philosophy and the sciences to visualize processes that are otherwise unavailable to us due to the limitations of our perceptual faculties no matter how sophisticated the tools for analysis from microscopes to telescopes have become This book concludes with a consideration of the relations between parts and wholes in process panpsychist and ecological terms It revisits the question of ecological balance and the place of human activities in relation to it with reference to works of Charles Hartshorne and William James

**Alzheimer's Disease Memoirs** Pramod K Nayar, 2021-12-06 This book examines writings by people living with Alzheimer s Disease and their caregivers Its focus areas include the construction of the self in the face of diminishing linguistic and cognitive abilities the stigmatization of ageing the various narrative strategies that these texts often collaborative employ the health activism and advocacy generated via a biosociality and the ethics of care It examines the disease writing genre about a condition that ravages the ability to use language It serves as a literary examination of the work done in this area through a critical reading of the memoirs of those with AD and caregivers and a healthy dose of literary theory The book is a valuable resource for those interested in literary and critical theory and researchers in the field of ageing dementia studies

**Recursivity and Contingency** Yuk Hui, 2019-01-28 This book employs recursivity and contingency as two principle concepts to investigate into the relation between nature and technology machine and organism system and freedom It reconstructs a trajectory of thought from an Organic condition of thinking elaborated by Kant passing by the philosophy of nature Schelling and Hegel to the 20th century Organicism Bertalanffy Needham Whitehead Wiener among others and Organology Bergson Canguilhem Simondon Stiegler and questions the new condition of philosophizing in the time of algorithmic contingency ecological and algorithmic catastrophes which Heidegger calls the end of philosophy The book centres on the following speculative question if in the philosophical tradition the concept of contingency is always related to the laws of nature then in what way can we understand contingency in related to

technical systems The book situates the concept of recursivity as a break from the Cartesian mechanism and the drive of system construction it elaborates on the necessity of contingency in such epistemological rupture where nature ends and system emerges In this development we see how German idealism is precursor to cybernetics and the Anthropocene and Noosphere Teilhard de Chardin point toward the realization of a gigantic cybernetic system which lead us back to the question of freedom It questions the concept of absolute contingency Meillassoux and proposes a cosmotechnical pluralism Engaging with modern and contemporary European philosophy as well as Chinese thought through the mediation of Needham this book refers to cybernetics mathematics artificial intelligence and inhumanism *The Urban Brain* Nikolas Rose, Des Fitzgerald, 2022-03-22 Bridging the social and life sciences to unlock the mystery of how cities shape mental health and illness Most of the world's people now live in cities and millions have moved from the countryside to the rapidly growing megacities of the global south How does the urban experience shape the mental lives of those living in and moving to cities today Sociologists study cities as centers of personal progress and social innovation but also exclusion racism and inequality Psychiatrists try to explain the high rates of mental disorders among urban dwellers especially migrants But the split between the social and life sciences has hindered understanding of how urban experience is written into the bodies and brains of urbanites In *The Urban Brain* Nikolas Rose and Des Fitzgerald seek to revive the collaboration between sociology and psychiatry about these critical questions Reexamining the relationship between the city and the brain Rose and Fitzgerald explore the ways cities shape the mental health and illness of those who inhabit them Drawing on the social and life sciences *The Urban Brain* takes an ecosocial approach to the vital city in which humans live and thrive but too often get sick and suffer The result demonstrates what we can gain by a vitalist approach to the mental lives of those migrating to and living in cities focusing on the ways that humans make remake and inhabit their urban lifeworlds **Anatomy of the Medical Image**, 2021-09-27 This volume addresses the interdependencies between visual technologies and epistemology with regard to our perception of the medical body It explores the relationships between the imagination the body and concrete forms of visual representations Ranging from the Renaissance paradigm of anatomy to Foucault's birth of the clinic and the institutionalised construction of a medical gaze from visual archives of madness psychiatric art collections the politicisation and economisation of the body to the post human in mass media representations Contributions to this volume investigate medical bodies as historical technological and political constructs constituted where knowledge formation and visual cultures intersect Contributors are Axel Fliethmann Michael Hau Birgit Lang Carolyn Lau Heikki Lempa stef lenk Joanna Madloch Barry Murnane Jill Redner Claudia Stein Elizabeth Stephens Corinna Wagner and Christiane Weller **On the Politics of the Living** Federico Testa, 2025-04-17 Bringing the philosophies of Michel Foucault and Georges Canguilhem into dialogue Federico Testa examines the notions of life and norms underlying our modern experience of politics Today's global health crisis acts as a stark reminder that life is at the core of our political debates and dilemmas We can no longer

think of forms of political organization citizenship and participation without considering the materiality and precarity of our own organic life Ours is a politics of the living Within this context this book examines Foucault s work on the politicization of life and biopolitics through the lens of Canguilhem s notion of norms Testa extracts from Canguilhem s philosophy the conceptual tools to re interpret Foucault s ideas on power and reconceptualises normativity as a process of the creation of norms that provide tools for political and social analysis and for thinking resistance In so doing he uncovers new and important possibilities for biopolitical resistance Demonstrating not only Canguilhem s underexplored social and political concerns but also the intellectual osmosis between the two thinkers On the Politics of the Living is an urgent examination of the ever increasing significance of the concepts of life care and health in today s political discourse **The Ahuman**

**Manifesto** Patricia MacCormack,2020-01-23 We are in the midst of a growing ecological crisis Developing technologies and cultural interventions are throwing the status of human into question It is against this context that Patricia McCormack delivers her expert justification for the ahuman An alternative to posthuman thought the term paves the way for thinking that doesn t dissolve into nihilism and despair but actively embraces issues like human extinction vegan abolition atheist occultism death studies a refusal of identity politics deep ecology and the apocalypse as an optimistic beginning In order to suggest vitalistic perhaps even optimistic ways to negotiate some of the difficulties in thinking and acting in the world this book explores five key contemporary themes Identity Spirituality Art Death The apocalypse Collapsing activism artistic practice and affirmative ethics while introducing some radical contemporary ideas and addressing specifically modern phenomena like death cults intersectional identity politics and capitalist enslavement of human and nonhuman organisms to the point of zombiedom The Ahuman Manifesto navigates the ways in which we must compose the human differently specifically beyond nihilism and post and trans humanism and outside human privilege This is so that we can actively think and live viscerally with connectivity actual not virtual and with passion and grace toward a new world *Canguilhem and*

*Continental Philosophy of Biology* Giuseppe Bianco,Charles T. Wolfe,Gertrudis Van de Vijver,2023-02-01 This edited volume presents papers on this alternative philosophy of biology that could be called continental philosophy of biology and the variety of positions and solutions that it has spawned In doing so it contributes to debates in the history and philosophy of science and the history of philosophy of science as well as to the craving for history and or theory in the theoretical biological disciplines In addition however it also provides inspiration for a broader image of philosophy of biology in which these traditional issues may have a place The volume devotes specific attention to the work of Georges Canguilhem which is central to this alternative tradition of continental philosophy of biology This is the first collection on Georges Canguilhem and the Continental tradition in philosophy of biology The book should be of interest to philosophers of biology continental philosophers historians of biology and those interested in broader traditions in philosophy of science **The Bergsonian**

**Mind** Mark Sinclair,Yaron Wolf,2021-12-30 Henri Bergson 1859 1941 is widely regarded as one of the most original and

important philosophers of the twentieth century His work explored a rich panoply of subjects including time memory free will and humour and we owe the popular term *lan vital* to a fundamental insight of Bergson s His books provoked responses from some of the leading thinkers and philosophers of his time including Albert Einstein William James and Bertrand Russell and he is acknowledged as a fundamental influence on Marcel Proust The Bergsonian Mind is an outstanding wide ranging volume covering the major aspects of Bergson s thought from his early influences to his continued relevance and legacy Thirty six chapters by an international team of leading Bergson scholars are divided into five clear parts Sources and Scene Mind and World Ethics and Politics Reception Bergson and Contemporary Thought In these sections fundamental topics are examined including time freedom and determinism memory perception evolutionary theory pragmatism and art Bergson s impact beyond philosophy is also explored in chapters on Bergson and spiritualism physics biology cinema and post colonial thought An indispensable resource for anyone in Philosophy studying and researching Bergson s work The Bergsonian Mind will also interest those in related disciplines such as Literature Religion Sociology and French Studies

Death Activism Patricia MacCormack, 2025-02-06 Traditional Western attitudes towards death deal with it as a painful inevitability something that has to be navigated as a trauma and a taboo They focus essentially on the management of death an anthropocentric practice prioritising the human life above every other type of existence Patricia MacCormack explores how we can develop a death activism a variety of tactics and posthuman practices which celebrate death its inevitability its forms from the slow to times of crisis and how trauma and mourning emerge as their own forms of expression Crucial to the foundation of death activism is the dissymmetry with which different deaths are met including the mass death of nonhuman animals and ecologies Death Activism is a feminist queer postcolonialist enquiry that seeks to queer death making queer our usual familiar death habits and trajectories of thought toward a jubilant activism that can transform death into a more democratically equal and a more jubilant force for life

Ontology and Perversion Boštjan Nedoh, 2019-06-04 This book examines the philosophical and political relevance of perversion in the works of three key representatives of contemporary philosophy and psychoanalysis Gilles Deleuze Giorgio Agamben and Jacques Lacan Perversion is often understood simply in terms of cultural or sexual phenomena By contrast Bo tjan Nedoh places perversion at the heart of philosophical ontological and political issues in the works of Deleuze Agamben and Lacan He examines the relevance of their discussions of perversion for their respective critical ontological projects By tracing the differences between these thinkers understanding of perversion the book finally draws lines of delimitation between the vitalist and the structuralist or psychoanalytic philosophical positions in contemporary philosophy

**Analytic and Continental Philosophy** Sonja Rinofner-Kreidl, Harald A. Wiltsche, 2016-08-08

*Bergson and Freedom* Brian Macallan, 2024-12-13 This book provides the first full length treatment of the nature and function of freedom within the work of Henri Bergson It does so while also introducing Bergson s key ideas and major works It explores Bergson through the lens of freedom while at the same time showing how Bergson s

work might engage with current challenges It does this by examining the four major works of Bergson highlighting how freedom can be conceived in each text and how Bergson addresses key freedom problematics in those works It offers a definition of freedom in Bergson as the creation of the new within the flow of duration What emerges is that freedom remains crucial for Bergson beyond the obvious treatment of freedom directly in *Time and Free Will* Free will memory evolution religion and morality are major themes for Bergson Moreover there are particular freedom problematics concerning each of those themes that illustrate the central importance of freedom in Bergson These include determinism dualism materialism mechanism finalism and the notion of the open and closed

*Embodied Narration* Heike Hartung, 2018-08-07 Do liminal embodied experiences such as illness death and dying affect literary form In recent years the concept of embodiment has been theorized from various perspectives Gender studies have been concerned with the cultural implications of embodiment arguing to move away from viewing the body as a prediscursive phenomenon to regarding it as an acculturated body Age studies have extended this view to the embodied experience of ageing while drawing attention to the ways in which the ageing body through its materiality and plasticity restricts the possibilities of de constructing subjectivity These current debates on embodiment find a strong counterpart in literary representation The contributions to this anthology investigate how and to what extent physical borderline experiences affect literary form
